

Subject Index

Abatement and removal

- Advances in Water and Wastewater Treatment, 1845
- Benzene Nonaqueous Phase Liquids Removal under Air-Sparged Conditions, 603
- Catalytic Oxidation of Volatile Organic Liquids, 556
- Cation Effects on Chromium Removal in Permeable Reactive Walls, 616
- Complicating Factors of using Ethylenediamine Tetraacetic Acid to Enhance Electrokinetic Remediation of Multiple Heavy Metals in Clayey Soils, 670
- Low-Temperature Oxygen Trap for Maintaining Strict Anoxic Conditions, 675
- Modeling Drainwater Selenium Removal in Wetlands, 1025
- Monitoring the Tendency of Heavy Metals Leached from Cement Mortar, 1713
- Oxidation of Toluene in Waste Gas Streams using Mesoporous Ti-Hexagonal Mesoporous Silica, 559
- Reduction of Natural Organic Matter and Disinfection By-Product Precursors by Coagulation and Adsorption, 1716
- Release of Contaminants from Melting Spray Ice of Industrial Wastewaters, 150
- Removal of a Volatile Organic Compound in a Hybrid Rotating Drum Biofilter, 551
- Removal of Aqueous Phase Trichloroethylene using Membrane Air Stripping Contactors, 658
- Role of Biofloculation on Chemical Oxygen Demand Removal in Solids Contact Chamber of Trickling Filter/Solids Contact Process, 600
- Zeta Potential, Dissolved Organic Carbon, and Removal of *Cryptosporidium* Oocysts by Coagulation and Sedimentation, 677

Absorbers

- Vibration Control of the Wind-Excited 76-Story Benchmark Building by Liquid Column Vibration Absorbers, 414

Absorption

- Control of Vaporous Naphthalene by Scrubbing with Surfactants, 550
- Corrosion Response of a Decommissioned Deteriorated Bridge Deck, 1204
- Optical Measurement of NO₂ Generation during the Combustion of Coal and Densified Municipal Waste, 364
- Optimization of Bioscrubber Performances: Experimental and Modeling Approaches, 554
- Pore Blockage Effects on Atrazine Adsorption in a Powdered Activated Carbon/Membrane System. II: Model Verification and Application, 660

Abutments

- Clear-Water Scour at Abutments in Thinly Armored Beds, 887

Acceleration

- Effects of Site Classes on Damping Reduction Factors, 1404

Accelerometers

- Integrating a Global Positioning System and Accelerometers to Monitor the Deflection of Bridges, 1452

Acceptability

- Socioeconomic Implications of Life Quality Index in design of Optimum Structures to Withstand Earthquakes, 1336

Accident prediction

- Tool to Evaluate Safety Effects of Changes in Freeway Traffic Flow, 1493

- Truck Safety Factors on Urban Arterials, 1551

Accident prevention

- Capturing Safety Knowledge using Design-for-Safety-Process Tool, 288

Accounting

- Empirical Study of Strategic Performance of Global Construction Firms, 344

Accreditation

- Assessing Outcomes using Program Assessment Portfolio Approach, 1232

Accretion

- Annual Variations of Tide Level and Mudflat Profile, 1646

Accuracy

- Evaluation of AASHTO Live Load and Line Load Distribution Factors for I-Girder Bridge Decks, 1768

Acid mine water

- Long-Term Behavior of Fixated Flue Gas Desulfurization Material Grout in Mine Drainage Environments, 611

Acids

- Chelating-Agent-Enhanced Heavy Metal Extraction from a Contaminated Acidic Soil, 526
- Complicating Factors of using Ethylenediamine Tetraacetic Acid to Enhance Electrokinetic Remediation of Multiple Heavy Metals in Clayey Soils, 670
- Determining the Volatile Fatty Acid Equivalent in Thermophilic Aerobically Digested Sludge Supernatant, 564
- Improved Anaerobic Process Efficiency Using Mesophilic and Thermophilic Elutriated Phased Treatment, 630
- Long-Term Performance of Epoxy Coated Clay Bricks in Sulfuric Acid, 1145
- Metal Recovery and Catalyst Reuse from the Photocatalytic Oxidation of Copper-Ethylenediaminetetraacetic Acid, 567

Acoustic detection

- Acoustic Emission Characterization of Damage in Hybrid Fiber-Reinforced Polymer Rods, 164
- Evaluation of Compliance Changes in Concrete Beams Reinforced by Glass Fiber Reinforced Plastics using Acoustic Emission, 1154
- Natural Excitation Technique and Eigensystem Realization Algorithm for Phase I of the IASC-ASCE Benchmark Problem: Simulated Data, 368

Activated carbon

- Adsorption onto Activated Carbon Cloths and Electrothermal Regeneration: Its Potential Industrial Applications, 547

Capture of Organic Vapors using Adsorption and Electrothermal Regeneration, 548

Electrothermal Desorption using Joule Effect on an Activated Carbon Monolith, 546

Equilibrium Adsorption of Phenol-, Tire-, and Coal-Derived Activated Carbons for Organic Vapors, 545

Microwave Technology for Treatment of Fume Hood Exhaust, 557

Modeling Volatile Organic Compound Sorption in Activated Carbon. I: Dynamics and Single-Component Equilibrium, 543

Modeling Volatile Organic Compound Sorption in Activated Carbon. II: Multicomponent Equilibrium, 544

Organic Vapor Recovery and Energy Efficiency during Electric Regeneration of an Activated Carbon Fiber Cloth Adsorber, 549

Pore Blockage Effects on Atrazine Adsorption in a Powdered Activated Carbon/Membrane System. I: Model Development, 659

Pore Blockage Effects on Atrazine Adsorption in a Powdered Activated Carbon/Membrane System. II: Model Verification and Application, 660

Use of Dubinin-Astakhov Equation to Describe Preloading Effect of Natural Organic Matter, 572

Activated sludge

Effects of Stressed Loading on Startup and Granulation in Upflow Anaerobic Sludge Blanket Reactors, 602

Fuzzy Controller for Thermophilic Aerobic Digestion Using Nicotinamide Adenine Dinucleotide Fluorescence, 604

High-Rate Biodegradation of Phenol by Aerobically Grown Microbial Granules, 676

Impact of Increased Chloride Concentration on Nitrifying-Activated Sludge Cultures, 532

Modeling a Combined Anaerobic/Anoxic Oxide and Rotating Biological Contactors Process under Dissolved Oxygen Variation by Using an Activated Sludge-Biofilm Hybrid Model, 678

Modeling and Predicting Biological Performance of Contact Stabilization Process using Artificial Neural Networks, 254

Properties of Four Biological Flocs as Related to Settling, 664

Radiation-Assisted Process Enhancement in Wastewater Treatment, 536

Removal of a Volatile Organic Compound in a Hybrid Rotating Drum Biofilter, 551

Stabilization/Solidification of Wastewater Treatment Sludge, 689

Statistical Comparison of Bioassays for Assessment of Toxicity of Organic Components of Wastewater to Activated Sludge, 574

Active control

Active Control of Cross Wind Response of 76-Story Tall Building using a Fuzzy Controller, 416

Hybrid Feedback-Least Mean Square Algorithm for Structural Control, 1251

Linear Multiobjective Control Strategies for Wind-Excited Buildings, 413

Multiobjective Optimal Fuzzy Logic Control System for Response Control of Wind-Excited Tall Buildings, 421

Multiobjective Optimal Fuzzy Logic Controller Driven Active and Hybrid Control Systems for Seismically Excited Nonlinear Buildings, 405

Scheduled Controllers for Buildings under Seismic Excitation with Limited Actuator Capacity, 451

Semiactive Neurocontrol for Seismic Response Reduction Using Smart Damping Strategy, 247

Study on Sinusoidal Reference Strategy-Based Adaptive Feedforward Control Applied to Benchmark Wind-Excited Building, 420

Wavelet-Hybrid Feedback-Least Mean Square Algorithm for Robust Control of Structures, 1252

Adaptive systems

Pragmatism, Adaptation, and Total Quality Management: Philosophy and Science in the Service of Managing Continuous Improvement, 1087

Study on Sinusoidal Reference Strategy-Based Adaptive Feedforward Control Applied to Benchmark Wind-Excited Building, 420

Viewing Total Maximum Daily Loads as a Process, Not a Singular Value: Adaptive Watershed Management, 597

Adhesive bonding

Fatigue Behavior of Carbon Fiber Reinforced Polymer-Strengthened Reinforced Concrete Bridge Girders, 211

Freeze-Thaw Resistance of Fiber-Reinforced Polymer Composites Adhesive Bonds with Underwater Curing Epoxy, 1137

High-Order Analysis of Reinforced Concrete Slabs Strengthened with Circular Composite Laminated Patches of General Layout, 505

Adhesives

Adhesively Bonded and Translucent Glass Fiber Reinforced Polymer Sandwich Girders, 207

Delamination Effects in Reinforced Concrete Slabs Strengthened with Circular Composite Patches, 514

Effect of Lamina Thickness on Parallel-to-Grain Strength in Small Douglas-Fir Samples, 114

Admixtures

Fundamental Parameters of Cement-Admixed Clay-New Approach, 797

Migration of Heavy Metals in Saturated Sand and Bentonite/Soil Admixture, 623

Swell Potential of Pulverized Coal Combustion Bottom Ash Amended with Sodium Bentonite, 362

Undrained Shear Behavior of Cement Admixed Clay at High Water Content, 802

Adsorption

Adsorption Characteristics of Oxide Coated Buoyant Media ($p < 1.0$) for Storm Water Treatment. I: Batch Equilibrium and Kinetics, 561

Adsorption Characteristics of Oxide Coated Buoyant Media ($p < 1.0$) for Storm Water Treatment. II: Equilibrium and Kinetic Models, 562

Adsorption onto Activated Carbon Cloths and Electrothermal Regeneration: Its Potential Industrial Applications, 547

Assessment of Trace Estrogenic Contaminants Removal by Coagulant Addition, Powdered Activated Carbon Adsorption and Powdered Activated Carbon/Microfiltration Processes, 601

Capture of Organic Vapors using Adsorption and Electrothermal Regeneration, 548

Characterization of Clay Particle Surfaces for Contaminant Sorption in Soil Barriers Using Flow Microcalorimetry, 625

SUBJECT INDEX

Aggregates

- Effect of Moisture on the Adsorption of Volatile Organic Compounds by Zeolite 13X, 656
- Electrothermal Desorption using Joule Effect on an Activated Carbon Monolith, 546
- Equilibrium Adsorption of Phenol-, Tire-, and Coal-Derived Activated Carbons for Organic Vapors, 545
- Evaluation of Metal Attenuation through Paper Clay Utilized for Containment of Contaminated Groundwater, 618
- Influence of Citrate on Adsorption of Zinc in Soils, 653
- Modeling Volatile Organic Compound Sorption in Activated Carbon. II: Multicomponent Equilibrium, 544
- Organic Vapor Recovery and Energy Efficiency during Electric Regeneration of an Activated Carbon Fiber Cloth Adsorber, 549
- Packed Column and Hollow Fiber Air Stripping of a Contaminant-Surfactant Stream, 520
- Pore Blockage Effects on Atrazine Adsorption in a Powdered Activated Carbon/Membrane System. I: Model Development, 659
- Reduction of Natural Organic Matter and Disinfection By-Product Precursors by Coagulation and Adsorption, 1716
- Removal of 17 β Estradiol and Fluoranthene by Nanofiltration and Ultrafiltration, 681
- Stabilization/Solidification of Wastewater Treatment Sludge, 689
- Temperature Effect on Concrete Creep Modeled by Microstress-Solidification Theory, 438
- Use of Dubinin-Astakhov Equation to Describe Preloading Effect of Natural Organic Matter, 572
- Advection**
- Characteristics Method using Cubic-Spline Interpolation for Advection-Diffusion Equation, 883
- Evapotranspiration Crop Coefficients for Cattail and Bulrush, 967
- Gas Permeability of Partially Hydrated Geosynthetic Clay Liners, 702
- Numerical Solution of Fractional Advection-Dispersion Equation, 866
- Aeration**
- Experimental Investigation on Influence of Aeration on Plane Jet Scour, 841
- Flow Characteristics of Skimming Flows in Stepped Channels, 907
- Aerial photography**
- Developing an Automated Procedure for Extraction of Road Data from High-Resolution Satellite Images for Geospatial Information Systems, 1538
- Aerobic treatment**
- Effect of Organic Loading Rate on Aerobic Granulation. II: Characteristics of Aerobic Granules, 645
- Fuzzy Controller for Thermophilic Aerobic Digestion Using Nicotinamide Adenine Dinucleotide Fluorescence, 604
- Aerodynamics**
- Efficacy of the Implied Approximation in the Identification of Flutter Derivatives, 1443
- Aeroelasticity**
- Estimation of Aeroelastic Parameters of Bridge Decks using Neural Networks, 507
- Mathematical Modeling and Analysis of Flutter in Bending-Torsion Coupled Beams, Rotating Blades, and Hard Disk Drives, 49
- Mathematical Modeling and Analysis of Flutter in Long-Span Suspension Bridges and in Blood Vessel Walls, 50
- Aerospace engineering**
- Investigation of Geometric Imperfection in Inflatable Aerospace Structures, 53
- Aerospace industry**
- High-Speed Centrifugal Compressor Instabilities during Speed Transients, 54
- Afghanistan**
- The Road from Kabul to Kandahar, 1789
- Africa**
- East African Rainfall Anomaly Patterns in Association with El Niño/Southern Oscillation, 970
- Zemmouri, Algeria, M., 6.8 Earthquake of May 31, 2003, 1890
- Aggregate gradation**
- Ternary and Multivariate Quality Control Charts of Aggregate Gradation for Hot Mix Asphalt, 1106
- Aggregates**
- Analytical Derivation of Permeability and Numerical Simulation of Fluid Flow in Hot-Mix Asphalt, 1162
- Applicability of Oxidation Reduction Potential Response on a Full-Scale Intermittently Aerated Suspended Culture System, 1712
- Application of Imaging Techniques to Geometry Analysis of Aggregate Particles, 227
- Automated Quality Assessment of Stone Aggregates Based on Laser Imaging and a Neural Network, 225
- Compression and Deformation Performance of Concrete Containing Postconsumer Plastics, 1138
- Compression and Shear Behavior of Mudstone Aggregates, 743
- Discrete Element Modeling to Predict the Modulus of Asphalt Concrete Mixtures, 1121
- Discrete-Element Method Investigation of the Resilient Behavior of Granular Materials, 1524
- Effect of Aggregate Angularity on Base Material Properties, 1177
- Gradation Control of Bottom Ash Aggregate in Superpave Bituminous Mixes, 1176
- Impact of Quality Control Practices in Sandcrete Blocks Production, 68
- Microstructural Simulation of Asphalt Materials: Modeling and Experimental Studies, 1117
- Modeling Nonlinear Anisotropic Elastic Properties of Unbound Granular Bases using Microstructure Distribution Tensors, 36
- Pavement Design Model for Unbound Granular Materials, 1543
- Performance of Brick Aggregate Concrete at High Temperatures, 1170
- Potential Use of Volcanic Pumice as a Construction Material, 1172
- Prediction of Hot Mix Asphalt Stability using the Superpave Gyrotory Compactor, 1173
- Recycling of Demolished Masonry Rubble as Coarse Aggregate in Concrete: Review, 1143
- Sedimentation of Oil-Mineral Aggregates for Remediation of Vegetable Oil Spills, 525

- Select Engineering Characteristics of Crushed Glass, 1167
- Technical and Computational Aspects of the Measurement of Aggregate Shape by Digital Image Analysis, 220
- Tire Derived Aggregate -- A New Geomaterial for Your Toolbox, 1835
- Treatments for the Improvement of Recycled Aggregate, 1175
- Aggregation**
- Accuracy Evaluation of Rainfall Disaggregation Methods, 952
- Global Optimization of Combined Region Aggregation and Leveling Model, 235
- Selection of the Appropriate Aggregation Function for Calculating Leachate Pollution Index, 1740
- Use of Next Generation Weather Radar Data and Basin Disaggregation to Improve Continuous Hydrograph Simulations, 954
- Aging**
- Environmental Fatigue and Static Behavior of RC Beams Strengthened with Carbon-Fiber-Reinforced Polymer, 179
- Experimental Study on the Aging of Sands, 798
- Influence of Environmental Aging on Properties of Polymeric Mortars, 1160
- Mechanical Properties and Strength of Aged Cast Iron Water Pipes, 1111
- Temperature Effect on Concrete Creep Modeled by Microprestress-Solidification Theory, 438
- Agricultural wastes**
- Use of Qualitative and Quantitative Information in Neural Networks for Assessing Agricultural Chemical Contamination of Domestic Wells, 996
- Agriculture**
- Analysis of Hydrologic and Agricultural Droughts in Central Part of Iran, 987
- Evapotranspiration of Full-, Deficit-Irrigated, and Dryland Cotton on the Northern Texas High Plains, 1049
- Managing Groundwater Levels in an Agricultural Area with Peat Soils, 1604
- Place, Perception, and Choice: Response of Citrus Growers to Freeze in California, 1708
- Air conditioning**
- Design of School Building HVAC Retrofit with Hybrid Geothermal Heat-Pump System, 74
- Air injection**
- Benzene Nonaqueous Phase Liquids Removal under Air-Sparged Conditions, 603
- Air pollution**
- Adsorption onto Activated Carbon Cloths and Electrothermal Regeneration: Its Potential Industrial Applications, 547
- Behavior of Field-Scale Biotrickling Filter under Non-steady State Conditions, 555
- Capture of Organic Vapors using Adsorption and Electrothermal Regeneration, 548
- Control of Molybdenum Emission by Sorbents: Equilibrium Analysis, 541
- Control of Vaporous Naphthalene by Scrubbing with Surfactants, 550
- Conversion of Full-Scale Wet Scrubbers to Biotrickling Filters for H₂S Control at Publicly Owned Treatment Works, 646

- Destruction of 1,1,1-Trichloroethane using Dielectric Barrier Discharge Nonthermal Plasma, 558
- Effect of Air Pollution on Atmospheric Corrosion of Engineering Metals, 1742
- Electrothermal Desorption using Joule Effect on an Activated Carbon Monolith, 546
- Equilibrium Adsorption of Phenol-, Tire-, and Coal-Derived Activated Carbons for Organic Vapors, 545
- Influence of Sodium Dodecyl Sulfate and Tween 20 on Fungal Growth and Toluene Degradation in a Vapor-Phase Bioreactor, 552
- Integration Modeling Framework for Estimating Mobile Source Emissions, 1489
- Microscale Emission Models Incorporating Acceleration and Deceleration, 1508
- Microwave Technology for Treatment of Fume Hood Exhaust, 557
- Modeling Volatile Organic Compound Sorption in Activated Carbon. I: Dynamics and Single-Component Equilibrium, 543
- Modeling Volatile Organic Compound Sorption in Activated Carbon. II: Multicomponent Equilibrium, 544
- Northern Exposure, 1807
- Optimization of Bioscrubber Performances: Experimental and Modeling Approaches, 554
- Organic Vapor Recovery and Energy Efficiency during Electric Regeneration of an Activated Carbon Fiber Cloth Adsorber, 549
- Statistical Framework using GIS to Estimate Unpaved Road VMT for PM₁₀ Emission Inventories, 1566
- When Natural and Technological Disasters Collide: Lessons from the Turkey Earthquake of August 17, 1999, 1702
- Air quality**
- Evaluating Speed Differences Between Cars, Light-Duty Trucks, and Vans for Emissions Modeling, 1558
- Microscale Emission Models Incorporating Acceleration and Deceleration, 1508
- Air stripping**
- Packed Column and Hollow Fiber Air Stripping of a Contaminant-Surfactant Stream, 520
- Removal of Aqueous Phase Trichloroethylene using Membrane Air Stripping Contactors, 658
- Air traffic**
- Avoidance Maneuvering in the Vicinity of the Top of Descent, 61
- Deterministic Models for Degraded Airside Capacity and Delays, 1529
- Impact of Reduced Vertical Separation Minimum Implementation on Airport System Infrastructures, 1548
- Air water interactions**
- Incorporation of Wind Effects into Boussinesq Wave Models, 1666
- Aircraft**
- Air Show, 1778
- Avoidance Maneuvering in the Vicinity of the Top of Descent, 61
- Finite-Element Method-Based Model to Study High-Cycle Fatigue in Turbine Blades, 48
- New Large Aircraft Gate Requirement for Shared Space and Stage Construction, 1485

SUBJECT INDEX

Optimal City-Center Takeoff Operation of Tiltrotor Aircraft in One Engine Failure, 46
Sizing the Baggage Claim Area for the New Large Aircraft, 1499

Airfields

Impact of Reduced Vertical Separation Minimum Implementation on Airport System Infrastructures, 1548

Airlines

Optimized Schedules for Airline Routes, 1515

Airport design

ARO: Geographic Information Systems-Based System for Optimizing Airport Runway Orientation, 1530

Sizing the Baggage Claim Area for the New Large Aircraft, 1499

Airport runways

Airfield Pavements: Challenges and New Technologies, 1846

ARO: Geographic Information Systems-Based System for Optimizing Airport Runway Orientation, 1530

Bearing Capacity and Structural Classification of Flexible Airport Pavements, 1473

Finite Element Analysis Simulation of Airport Approach Lighting Towers, 1320

Impact of Reduced Vertical Separation Minimum Implementation on Airport System Infrastructures, 1548

Airport terminals

New Large Aircraft Gate Requirement for Shared Space and Stage Construction, 1485

Sizing the Baggage Claim Area for the New Large Aircraft, 1499

Toronto Takes Off, 1774

Airports

Bioclogging of Sand due to Biodegradation of Aircraft Deicing Fluid, 650

Deterministic Models for Degraded Airside Capacity and Delays, 1529

Effects of Security Measures: Deterrent versus Diversion, 55

Impact of Reduced Vertical Separation Minimum Implementation on Airport System Infrastructures, 1548

Alaska

Fabrication and Testing of Apparatus for Laboratory Simulation of Alaska Frozen Rock Encountered during Hydrate Gas Reservoir Coring, 151

Field Investigation of Soil Heave by a Large Diameter Chilled Gas Pipeline Experiment, Fairbanks, Alaska, 149

Modeling Impacts of Thaw Lakes to Ground Thermal Regime in Northern Alaska, 152

Near Field Characteristics of Landslide Generated Impulse Waves, 1664

San Simeon Earthquake of December 22, 2003 and Denali, Alaska, Earthquake of November 3, 2002, 1879

Alfalfa

Temperature Adjustment for Reference Evapotranspiration Calculation in Central Arizona, 1061

Algorithms

Algorithms

Application of a Genetic Algorithm for Optimal Damper distribution within the Nonlinear Seismic Benchmark Building, 403

Application of the Improved Immune Algorithm to Structural Design Support System, 1250

Applying a Genetic Algorithm-Based Multiobjective Approach for Time-Cost Optimization, 276

Booster Disinfection of Water Supply Networks: Multiobjective Approach, 1616

Computational Intelligence: From Theory to Practice, 1854

Constrained Fuzzy c-Mean Clustering Algorithm for Determining Bridge Let Projects, 241

Convergence of Traffic Assignments: How Much is Enough?, 1475

Distributed Scheduling Model for Infrastructure Networks, 275

Efficient Algorithm for Computing Einstein Integrals, 941

Efficient Algorithm for Inverse of the Fully Populated Covariance Matrix in Global Positioning System Relative Positioning, 1447

Experimentally Validated Added Mass Identification Algorithm Based on Frequency Response Functions, 475

Genetic Algorithms for Reliability-Based Optimization of Water Distribution Systems, 1588

GPSLoc: Framework for Predicting Global Positioning System Quality of Service, 239

Heuristic Continuous Base Flow Separation, 976

Identification of Structural Systems using an Evolutionary Strategy, 485

Impacts of Physical and Chemical Heterogeneities on Aquifer Remediation Design, 1610

Improved Solution Algorithm for Multicommodity Continuous Distribution and Assignment Model, 1560

Irrigation Scheduling. II: Heuristics Approach, 1021

Life-Cycle Cost Award Algorithms for Design/Build Highway Pavement Projects, 1017

Logit-Based Stochastic User Equilibrium Problem for Entry-Exit Toll Schemes, 1557

Minimizing Network Disruption for Planned and Emergency Repairs of Water Supply Systems, 1018

Mixed Experimental and Numerical Approach to Evaluation of Material Parameters of Clayey Soils, 30

Modeling and Predicting Biological Performance of Contact Stabilization Process using Artificial Neural Networks, 254

Modified Iterative Group-Implicit Algorithm for the Dynamic Analysis of Structures, 1381

Multiobjective Genetic Algorithms for Design of Water Distribution Networks, 1589

Multiobjective Optimal Fuzzy Logic Control System for Response Control of Wind-Excited Tall Buildings, 421

Multiobjective Optimal Fuzzy Logic Controller Driven Active and Hybrid Control Systems for Seismically Excited Nonlinear Buildings, 405

Multiobjective Optimization of Earthmoving Operations, 269

Multiple-Vehicle Origin-Destination Matrix Estimation from Traffic Counts using Genetic Algorithm, 1507

Algorithms

- New Method for Transforming Global Positioning System Height into Normal Height Based on Neural Network, 1448
- Object-Oriented Optimization Approach using Genetic Algorithms for Lattice Towers, 236
- Optimal Design of Composite Channels Using Genetic Algorithm, 1050
- Optimum Bid Markup Calculation using Neurofuzzy Systems and Multidimensional Risk Analysis Algorithm, 252
- Performance Evaluation of Adaptive Ramp-Metering Algorithms using Microscopic Traffic Simulation Model, 1506
- Performance of Model Predictive Control on ASCE Test Canal 1, 1045
- Robust Water Quality Model Calibration using an Alternating Fitness Genetic Algorithm, 1626
- Scheduling of Lane Closures using Genetic Algorithms with Traffic Assignments and Distributed Simulations, 1505
- Semiactive Neurocontrol for Seismic Response Reduction Using Smart Damping Strategy, 247
- Shuffled Complex Evolution Algorithms in Infrastructure Works Programming, 245
- Transit Route Network Design Using Parallel Genetic Algorithm, 244
- Two-Stepped Evolutionary Algorithm and its Application to Stability Analysis of Slopes, 234
- Use of Genetic Algorithm in Optimization of Irrigation Pumping Stations, 1058
- Use of Genetic Algorithms in Resource Scheduling of Construction Projects, 351
- Alignment**
- Intersection Construction Cost Functions for Alignment Optimization, 1490
- Radius Requirements for Reverse Horizontal Curves on Three-Dimensional Alignments, 1537
- Alkalinity**
- Impact of Water Blending on Calcium Carbonate Equilibrium in Water Distribution Systems, 640

SUBJECT INDEX

Dynamic analysis

Dredge spoil

Leachate Dispersion in Aquifers under Disposal Facilities, 1727

Recycled Materials in Geotechnics, 1877

Retardation of Dredged Material Leachate in Foundation Soils, 691

Dredging

Development of Fatigue Monitoring System for a Hydraulic Excavator, 1770

Fundamentally Sound, 1795

Impacts of Dredging on Shoreline Change, 1652

Nearshore Impacts of Dredging for Beach Nourishment, 1665

Ports 2004: Port Development in the Changing World, 1872

Drift

Reversed In-Plane Cyclic Behavior of Posttensioned Clay Brick Masonry Walls, 1318

Drilled shafts

Constant Force Shaking of a Group of Four Drilled Shafts, 705

GeoSupport 2004: Drilled Shafts, Micropiling, Deep Mixing, Remedial Methods, and Specialty Foundation Systems, 1861

Simplified Lateral Load Analyses of Fixed-Head Piles and Pile Groups, 806

Drilling

Drill and Blast Tunneling Practices, 4

Management of Radon in Tunnel Drilling, 332

Reducing Risks in Unfavorable Ground Conditions during Horizontal Directional Drilling, 1763

Driven piles

Assessment of Direct Cone Penetration Test Methods for Predicting the Ultimate Capacity of Friction Driven Piles, 787

Driver behavior

Microscopic Modeling of Driver Behavior in Uninterrupted Traffic Flow, 1518

Understanding Drivers' Route Choice under Long-Term Pretrip and Short-Term En-Route Traffic Information using Generalized Estimating Equations, 1554

Droughts

Analysis of Hydrologic and Agricultural Droughts in Central Part of Iran, 987

Reducing Drought Risk: Bridging Theory and Practice, 1700

Ductility

Behavior and Modeling of Fiber Reinforced Polymer-Confined Concrete, 1409

Behavior of Bond-Critical Regions Wrapped with Fiber-Reinforced Polymer Sheets in Normal and High-Strength Concrete, 183

Behavior of Eccentrically Loaded Concrete-Filled Steel Tubular Columns, 1259

Behavior of Reinforced Concrete Beams Strengthened with Externally Bonded Hybrid Carbon Fiber-Glass Fiber Sheets, 186

Bond Strength of Tension Lap Splices in High-Strength Concrete Beams Strengthened with Glass Fiber Reinforced Polymer Wraps, 158

Collapse Considerations and Electrical Analogies for Statically Indeterminate Structures, 1382

Constitutive Model for Confined High-Strength Concrete Subjected to Cyclic Loading, 1139

Ductile Design of Reinforced Concrete Beams Retrofitted with Fiber-Reinforced Polymer Plates, 210

Effectiveness of Composites in Earthquake Damage Repair of Reinforced Concrete Flared Columns, 190

Energy Release in Fiber-Reinforced Plastic Reinforced Concrete Beams, 162

Experimental and Analytical Reexamination of Classic Concrete Beam Tests, 1285

Experimental Study of Jumbo Size Reduced Beam Section Connections using High-Strength Steel, 1297

Guidelines: Seismic Design of Composite Reinforced Concrete and Steel Buildings, 1272

Improving the Ductility of Knee Joints between Rectangular Hollow Sections, 1417

Inelastic Force-Deformation Response of Joint Shear Panels in Beam-Column Moment Connections to Concrete-Filled Tubes, 1263

Load History Effect on Cyclic Behavior of Reinforced Concrete Tied Columns, 1401

Neutral Axis Depth versus Flexural Ductility in High-Strength Concrete Beams, 1284

Pre- and Postyield Finite Element Method Simulation of Bond of Ribbed Reinforcing Bars, 1306

Seismic Retrofit of State Street Bridge on Interstate 80, 117

Similitude Law of Prefracture Hysteresis of Steel Members, 1314

Strength and Ductility of Concrete Beams Reinforced with Carbon Fiber-Reinforced Polymer Plates and Steel, 163

Tests on Cyclic Behavior of Concrete-Filled Hollow Structural Steel Columns after Exposure to the ISO-834 Standard Fire, 1419

Dunes

Measuring Velocity and Shear Stress over Dunes with Acoustic Doppler Profiler, 915

Durability

Accelerated Weathering of Natural Fiber-Filled Polyethylene Composites, 1169

Assessment of Fossil Fuel Fly Ash Formulations in the Immobilization of Hazardous Wastes, 576

Cellular Automata Approach to Durability Analysis of Concrete Structures in Aggressive Environments, 1410

Durability Characteristics of Some Assorted Rocks, 154

Durability of Galvanized Light-Gauge Steel Shapes, 1247

SUBJECT INDEX

Electrical conductivity

Edge waves

High-Frequency Water Level Fluctuations in Lake Michigan, 1635

Education-practice interchange

Enhancing Civil Engineering Education and ABET Criteria through Practical Experience, 1214

Effective length

Alternative Approaches for Elastic Analysis and Design of Steel Frames. I: Overview, 1356

Alternative Approaches for Elastic Analysis and Design of Steel Frames. II: Verification Studies, 1357

Effective stress

Effective Stress in Unsaturated Soils: Review with New Evidence, 24

Effective width

Effective Widths of Unstiffened Elements with Stress Gradient, 1399

Service Load Effective Compression Flange Width in Fiber Reinforced Polymer Deck Systems Acting Compositely with Steel Stringers, 188

Efficiency

Centrifuge Model Study of Laterally Loaded Pile Groups in Clay, 721

Effluents

Systematic Approach for Quick Quality Assessment of Ink Effluents for Treatment and Discharge, 566

Egypt

Khufu and Kukulcán, 1787

Productivity Analysis for Boulac's Wastewater Micro-tunnels in Egypt, 1757

Sand Transport in Nile River, Egypt, 874

Ejectors

Performance of Low-Cost Ejectors, 1033

Elastic analysis

Adapting the CQC3 Rule for Three Seismic Components with Different Spectra, 1279

Elastic foundations

Effects of Flexibility on Rocking Impedance of Deeply Embedded Foundation, 736

Effects of Prescribed End Motion on the Dynamic Stability of a Shallow Arch on an Elastic Foundation, 399

Elastic media

Stress Predictions for Flexible Pavement Systems, 1523

Elastic properties

Engineering Properties of Grouted Sands, 726

Elasticity

Biaxial Bending of Steel Angle Section Beams, 1294

Buckling of Elastic Shallow Arches using the Theory of a Cosserat Point, 384

Continuum Mechanics of Lateral Soil-Pile Interaction, 503

Correlation of Elastic Constants with Penetration Resistance in Sandy Soils, 42

Elastic Solution for Tunneling-Induced Ground Movements in Clays, 41

Elastic Stability of Planar Steel Frames with Unsymmetrical Beam Loading, 1423

Flow Variation of Duckbill Valve Jet in Relation to Large Elastic Deformation, 469

Impulse Response of Elastic Half-Space in the Wave Number-Time Domain, 493

Modeling Nonlinear Anisotropic Elastic Properties of Unbound Granular Bases using Microstructure Distribution Tensors, 36

Pressure-Dependent Elasticity and Energy Conservation in Elastoplastic Models for Soils, 701

Elastomer

Flow Variation of Duckbill Valve Jet in Relation to Large Elastic Deformation, 469

Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. I: Experimental Study, 1350

Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. II: Modeling, 1351

Seismic Response of Isolated Bridges, 97

Three-Dimensional Finite-Element Analysis of High Damping Rubber Bearings, 431

Elastoplasticity

Dimensional Analysis of Rigid-Plastic and Elastoplastic Structures under Pulse-Type Excitations, 472

Earthquake Duration Effect on Structural Reliability, 1322

Elastoplastic and Large Deflection Analysis of Steel Frames by One Element per Member. I: One Hinge along Member, 1292

Elastoplastic and Large Deflection Analysis of Steel Frames by One Element per Member. II: Three Hinges along Member, 1293

Experimental Inspiration for Kinematic Hardening Soil Models, 435

Multiaxial Behaviors of Laminated Rubber Bearings and Their Modeling. II: Modeling, 1351

Numerical Assessment of the Influence of End Conditions on Constitutive Behavior of Geomaterials, 443

Oedometric Tests on Artificially Weathered Carbonatic Soft Rocks, 765

Pressure-Dependent Elasticity and Energy Conservation in Elastoplastic Models for Soils, 701

Wellbore Stability Analysis: From Linear Elasticity to Postbifurcation Modeling, 13

Electric power demand

Network Electricity Use Associated with Wireless Personal Digital Assistants, 1013

Optimal Retailer Load Estimates using Stochastic Dynamic Programming, 359

Electric power output

Wind Energy in India: Shifting Paradigms and Challenges Ahead, 363

Electric power supply

Optimal Retailer Load Estimates using Stochastic Dynamic Programming, 359

Electric transmission lines

Mathematical Modeling and Analysis of Flutter in Bending-Torsion Coupled Beams, Rotating Blades, and Hard Disk Drives, 49

Mathematical Modeling and Analysis of Flutter in Long-Span Suspension Bridges and in Blood Vessel Walls, 50

Electrical conductivity

Collapse Considerations and Electrical Analogies for Statically Indeterminate Structures, 1382

Electrical conductivity

Experimental Study on the Aging of Sands, 798
Soil Water Content and Dry Density by Time Domain Reflectometry, 786

Three-Dimensional Numerical Modeling of Mixing at River Confluences, 850

Electrical equipment

Cumulative Effect of Project Changes for Electrical and Mechanical Construction, 339

Modeling the Dynamic Behavior of Electrical Cabinets and Control Panels: Experimental and Analytical Results, 1290

Seismic Response of Electrical Substation Equipment Interconnected by Flexible Conductors, 1316

Electrical resistivity

Corrosion Response of a Decommissioned Deteriorated Bridge Deck, 1204

Spatial Variability in Soils: High Resolution Assessment with Electrical Needle Probe, 777

Electrokinetics

Complicating Factors of using Ethylenediamine Tetraacetic Acid to Enhance Electrokinetic Remediation of Multiple Heavy Metals in Clayey Soils, 670

Enhanced Electrokinetic Remediation of Heavy Metals in Glacial Till Soils using Different Electrolyte Solutions, 569

Preliminary Study on Treatment of Soil Enriched in Chromite Ore Processing Residue by Electrokinetics, 1717

Electronic equipment

Network Electricity Use Associated with Wireless Personal Digital Assistants, 1013

Embankments

Cost-Effective Temporary Microirrigation System for Grass Establishment on Environmentally Sensitive Steep Slopes, 1044

Geo Jordan 2004: Advances in Geotechnical Engineering with Emphasis on Dams, Highway Materials, and Soil Improvement, 1860

Geotechnical Engineering for Transportation Projects, 1862

Seismic Design of Column of Short Bridges Accounting for Embankment Flexibility, 1389

embankments

Wetting-Induced Compression of Compacted Oklahoma Soils, 794

Embedded foundations

Effects of Flexibility on Rocking Impedance of Deeply Embedded Foundation, 736

Embedment

Continuum Mechanics of Lateral Soil-Pile Interaction, 503

Lateral and Upward Soil-Pipeline Interactions in Sand for Deep Embedment Conditions, 776

Flutter

Efficacy of the Implied Approximation in the Identification of Flutter Derivatives, 1443

Estimation of Aeroelastic Parameters of Bridge Decks using Neural Networks, 507

Mathematical Modeling and Analysis of Flutter in Bending-Torsion Coupled Beams, Rotating Blades, and Hard Disk Drives, 49

Mathematical Modeling and Analysis of Flutter in Long-Span Suspension Bridges and in Blood Vessel Walls, 50

Fluvial hydraulics

Computational Dam-Break Hydraulics over Erodible Sediment Bed, 893

Energy Profiles across Constructed Riffles, 845

Scour on Alluvial Bed Downstream of Grade-Control Structures, 827

Sediment Threshold with Upward Seepage, 484

Fly ash

Assessment of Fossil Fuel Fly Ash Formulations in the Immobilization of Hazardous Wastes, 576

Carbonation-Porosity-Strength Model for Fly Ash Concrete, 1114

Collapse Behavior of Coal Ash, 733

Effect of Fly Ash on Engineering Properties of Expansive Soils, 769

Environmental Geochemistry of Leachate from Leached Brown Coal Ash, 688

Permeability and Consolidation Characteristics of Compacted Fly Ash, 360

Properties of Polymer Concrete using Fly Ash, 1104

Recycled Materials in Geotechnics, 1877

Stabilization/Solidification of Wastewater Treatment Sludge, 689

Testing the Effectiveness of Class C and Class F Fly Ash in Controlling Expansion due to Alkali-Silica Reaction using Modified ASTM C 1260 Test Method, 1105

Footings

Bearing Capacity of Strip Footings on Jointed Rock Masses, 824

Cyclic Testing of Concrete-Filled Circular Steel Bridge Piers having Encased Fixed-Based Detail, 82

Dynamic Response of Footings Resting on a Sand Layer of Finite Thickness, 758

Effects of Inclination of Bridge Piers on Scouring Depth, 904

Limit Loads on Reinforced Foundation Soils, 731

Seismic Design of Concrete-Filled Circular Steel Bridge Piers, 83

Forecasting

Feasibility of Using Urban Planning Models to Support Intermediate Traffic Forecasts, 1574

Forecasting Cargo Throughput for the Port of Hong Kong: Error Correction Model Approach, 1579

Forecasts and Reliability Analysis of Port Cargo Throughput in Hong Kong, 1572

Neural Networks for Rainfall Forecasting by Atmospheric Downscaling, 944

Probabilistic Forecasting of Project Performance using Stochastic S Curves, 260

Scenario Planning for Strategic Regional Transportation Planning, 1559

Short-Term Forecasting for Urban Water Consumption, 1620

Foreign projects

Neural Network Model to Support International Market Entry Decisions, 264

Formwork, construction

Work Inputs and Related Economic Aspects of Multi-tier Shoring Towers, 272

Fossil fuels

Assessment of Fossil Fuel Fly Ash Formulations in the Immobilization of Hazardous Wastes, 576

Fouling

Impact of Membrane Surface Modification on the Treatment of Surface Water, 680

Membrane Fouling Test: Apparatus Evaluation, 529

Foundation construction

Current Practices and Future Trends in Deep Foundations, 1856

Foundation design

Current Practices and Future Trends in Deep Foundations, 1856

Design Strategies for Piled Rafts Subjected to Nonuniform Vertical Loading, 694

Foundation Isolation for Seismic Protection using a Smooth Synthetic Liner, 804

SUBJECT INDEX

Numerical Study of the Bearing Behavior of Piled Rafts, 19

Foundations

- Can Those Old Foundations Be Re-Used?. 1833
Circular Elastic Plate Resting on Tensionless Pasternak Foundation, 497
Constant Force Shaking of a Group of Four Drilled Shafts, 705
Correlation of Elastic Constants with Penetration Resistance in Sandy Soils, 42
Dynamic Response of Footings Resting on a Sand Layer of Finite Thickness, 758
Dynamic Stiffnesses of Surface Foundations: An Explicit Solution, 32
GeoSupport 2004: Drilled Shafts, Micropiling, Deep Mixing, Remedial Methods, and Specialty Foundation Systems, 1861
Limit Loads on Reinforced Foundation Soils, 731
Modeling Expansive Soil Movements Beneath Structures, 749
Retardation of Dredged Material Leachate in Foundation Soils, 691
Theoretical Interpretation of Impulse Response Tests of Embedded Concrete Structures, 477

Fourier analysis

Application of Fourier Analysis to Digital Imaging for Particle Shape Analysis, 219

Fourier transform

Theoretical Interpretation of Impulse Response Tests of Embedded Concrete Structures, 477

Fractals

Fractal Approach to Unsaturated Shear Strength, 720

Fracture mechanics

- Analysis of Test Specimens for Cohesive Near-Bond Failure of Fiber-Reinforced Polymer-Plated Concrete, 214
Delamination Effects in Reinforced Concrete Slabs Strengthened with Circular Composite Patches, 514
Evaluating Four-Point Bend Fatigue of Asphalt Mix using Image Analysis, 1110
Evaluation of Fracture Energy of Composite-Concrete Bonded Interfaces Using Three-Point Bend Tests, 195
Modern Approach of Design of Welded Components Subjected to Fatigue Loading, 1321
Probabilistic Model for Polycrystalline Microstructures with Application to Intergranular Fracture, 471
Residual Stress Measurement and Fatigue Crack Growth Prediction after Cold Expansion of Cracked Fastener Holes, 52
Separation of Scales in Fracture Mechanics: From Molecular to Continuum Theory via Γ Convergence, 383
Size Effect in Axially Loaded Reinforced Concrete Columns, 1305
Use of M Integral for Rubbery Material Problems Containing Multiple Defects, 429

Fractures

- Discrete Element Modeling Applied to Laboratory Simulation of Near-Wellbore Mechanics, 15
Evaluation of Fracture Energy of Composite-Concrete Bonded Interfaces Using Three-Point Bend Tests, 195

Frazil ice

- Experimental Study of Jumbo Size Reduced Beam Section Connections using High-Strength Steel, 1297
Fatigue and Fracture of Steel Girders, 110
Fracture of Plain and Fiber-Reinforced Concrete Slabs under Monotonic Loading, 1159
Identification of Cracking in Beam Structures using Timoshenko and Euler Formulations, 502
Methodology for Random Surface-Initiated Crack Growth Prediction in Asphalt Pavements, 1125
Microstructure and Fracture in Asphalt Mixtures using a Boundary Element Approach, 1118
Multiple Fracture Propagation Model for a Three-Dimensional Hydraulic Fracturing Simulator, 18
Numerical Analysis of Mixed-Mode Fracture in Concrete using Extended Fictitious Crack Model, 1411
Pre- and Postyield Finite Element Method Simulation of Bond of Ribbed Reinforcing Bars, 1306
Propagation Regimes of Fluid-Driven Fractures in Impermeable Rocks, 17
Using Continuum Approach to Quantify the Remediation of Nonaqueous Phase Liquid Contaminated Fractured Permeable Formations, 669

Framed structures

- Design Models of Light Frame Wood Buildings under Lateral Loads, 1364
Effect of Column Stiffness on Braced Frame Seismic Behavior, 1277
Fragility Assessment of Light-Frame Wood Construction Subjected to Wind and Earthquake Hazards, 1429

A More Perfect Union, 1791

Overview of U.S.-Japan Research on the Seismic Design of Composite Reinforced Concrete and Steel Moment Frame Structures, 1275

Performance of Edge-Loaded Cold-Formed Steel Built-Up Box Beams, 1764

Seismic Analysis of Woodframe Structures. I: Model Formulation, 1373

Seismic Analysis of Woodframe Structures. II: Model Implementation and Verification, 1374

Frames

- Collapse Considerations and Electrical Analogies for Statically Indeterminate Structures, 1382
Column Stability and Minimum Lateral Bracing: Effects of Shear Deformations, 494
Experimental and Analytical Study of Masonry Infill Reinforced Concrete Frames Retrofitted with Steel Braces, 1439
Finite Element Method Analysis of Hybrid Structural Frames with Reinforced Concrete Columns and Steel Beams, 1271
Neural Network for Creep and Shrinkage Deflections in Reinforced Concrete Frames, 255
Nonlinear Analysis of Steel-Concrete Composite Structures: State of the Art, 1255
Rocking Wall-Frame Structures with Supplemental Tendon Systems, 1328
Simplified Procedure for Creep and Shrinkage Effects in Reinforced Concrete Frames, 1392

France

Rescue Mission, 1775

Frazil ice

Ice-Tank and Numerical Study of Frazil Ingestion by Submerged Intakes, 834

Free surfaces

Accuracy Order of Crank-Nicolson Discretization for Hydrostatic Free-Surface Flow, 462

Capillary Fringe and Unsaturated Flow in a Porous Reservoir Bank, 1063

Free-Surface—Vorticity Interactions in an Open Channel Flow, 856

Freeze-thaw

Conditioning of Wastewater Sludge from Science-Based Industrial Park using Freezing and Thawing, 693

Contaminant Barrier Material Textural Response to Interaction with Aqueous Polymers, 1135

Failure in Composite Materials due to Volumetric Expansion of Freezing Moisture, 155

Freeze—Thaw Resistance of Fiber-Reinforced Polymer Composites Adhesive Bonds with Underwater Curing Epoxy, 1137

Simulating the Effect of Liquid CO₂ on *Cryptosporidium parvum* Oocysts in Aquifer Material, 692

Freezing

Place, Perception, and Choice: Response of Citrus Growers to Freeze in California, 1708

Release of Contaminants from Melting Spray Ice of Industrial Wastewaters, 150

Freight transportation

Games, Heuristics, and Risk Averseness in Vehicle Routing Problems, 1562

Frequency

Dynamic Response of Footings Resting on a Sand Layer of Finite Thickness, 758

Frequency analysis

Analysis of the Seasonal Nature of Extreme Floods Across Canada, 986

Generalized Rainfall-Duration-Frequency Relationships: Applicability in Different Climatic Regions of Argentina, 971

Frequency response

Experimentally Validated Added Mass Identification Algorithm Based on Frequency Response Functions, 475

Frequency Modeling of Open-Channel Flow, 902

Frequency Response of Flag-Shaped Single Degree-of-Freedom Hysteretic Systems, 461

Simplified Modeling of Irrigation Canals for Controller Design, 1060

Friction

Characterization and Modeling of Friction Pendulum Bearings Subjected to Multiple Components of Excitation, 1282

Characterizing Surface Roughness and Shape of Sands using Digital Microscopy, 223

Economic Design of Center-Pivot Sprinkler Laterals, 1074

Foundation Isolation for Seismic Protection using a Smooth Synthetic Liner, 804

Rutting Prediction of Asphalt Pavement Layer Using C- Φ Model, 1544

Semistatic Control of the 20-Story Benchmark Building with Piezoelectric Friction Dampers, 402

Simplified Shear Design Method for Concrete Beams Strengthened with Fiber Reinforced Polymer Sheets, 203

Soil Isolation for Seismic Protection using a Smooth Synthetic Liner, 805

Yield Model of High Fluidity Concrete in Fresh State, 1127

Friction factor

Constraints for Using Lambert W Function-Based Explicit Colebrook-White Equation, 914

Engineering Model of Dilute Pneumatic Conveying, 450

Explicit Design of Commercial Pipes with No Secondary Losses, 1067

Froude number

Turbulence Structure of Hydraulic Jumps of Low Froude Numbers, 876

Frozen soils

Fabrication and Testing of Apparatus for Laboratory Simulation of Alaska Frozen Rock Encountered during Hydrate Gas Reservoir Coring, 151

Thermal Analysis, Construction, and Monitoring Methods for Frozen Ground, 1885

Full-scale tests

Blast-Induced Liquefaction for Full-Scale Foundation Testing, 773

Centrifuge Simulations of Large-Scale Shaking Table Tests: Case Studies, 759

Design Models of Light Frame Wood Buildings under Lateral Loads, 1364

Moment Connections to Circular Concrete-Filled Steel Tube Columns, 1260

Nonlinear System Identification of Reinforced Concrete Steel Structure: Using Pseudodynamic Testing Data, 455

Functional analysis

Functional Networks in Structural Engineering, 237

Furrow irrigation

Modeling Two-Dimensional Infiltration from Irrigation Furrows, 1051

Physically Based Modeling of Interacting Surface-Subsurface Flow during Furrow Irrigation Advance, 1057

Simulation Model for Level Furrows. I: Analysis of Field Experiments, 1031

Simulation Model for Level Furrows. II: Description, Validation, and Application, 1032

Furrow systems

Simulation Model for Level Furrows. II: Description, Validation, and Application, 1032

Fuzzy sets

Active Control of Cross Wind Response of 76-Story Tall Building using a Fuzzy Controller, 416

Application of Fuzzy Multiobjective Function on Storm-Event Rainfall-Runoff Model Calibration, 991

Constrained Fuzzy c-Mean Clustering Algorithm for Determining Bridge Let Projects, 241

Controlling Wind Response through a Fuzzy Controller, 415

Data Division for Developing Neural Networks Applied to Geotechnical Engineering, 230

Development and Calibration of Route Choice Utility Models: Neuro-Fuzzy Approach, 1488

Fuzzy Clustering Model for Estimating Haulers' Travel Time, 352

SUBJECT INDEX

Fuzzy Controller for Seismically Excited Nonlinear Buildings, 404

Fuzzy Controller for Thermophilic Aerobic Digestion Using Nicotinamide Adenine Dinucleotide Fluorescence, 604

Fuzzy Decision-Making Tool for Environmental Sustainable Buildings, 302

Fuzzy Logic-Based Operation of Spillway Gates of Reservoirs during Floods, 1000

Fuzzy Waste Load Allocation Model: Simulation-Optimization Approach, 232

Fuzzy-Based Method to Evaluate Soil Corrosivity for Prediction of Water Main Deterioration, 1015

Fuzzy-State Stochastic Dynamic Programming for Reservoir Operation, 1265

Multiobjective Optimal Fuzzy Logic Control System for Response Control of Wind-Excited Tall Buildings, 421

Multiobjective Optimal Fuzzy Logic Controller Driven Active and Hybrid Control Systems for Seismically Excited Nonlinear Buildings, 405

Quantitative Assessment for Piles Productivity Factors, 301

Risk Assessment Methodology for Underground Construction Projects, 286

Risk Evaluation in Water Quality Management of a River System, 1621

Safety Evaluation for Campus Parking Garage Performance Using Fuzzy Logic, 1197

Seasonal Streamflow Forecasting using Snow Budget and El Niño-Southern Oscillation Climate Signals: Application to the Salt River Basin in Arizona, 998

Soft Computing Applications in Infrastructure Management, 1016

Vibration Control of Wind-Excited Tall Buildings using Sliding Mode Fuzzy Control, 418

Where Do We Stand with Fuzzy Project Scheduling?, 270

Gaging stations

Reproduction of Hysteresis in Rating Curves, 908

Gamma function

Gamma-Laguerre Formalism: Rigorous Approach and Application to Hydrologic Time Series, 972

Gas

Behavior of Field-Scale Biotrickling Filter under Non-steady State Conditions, 555

Capture of Organic Vapors using Adsorption and Electrothermal Regeneration, 548

Catalytic Oxidation of Volatile Organic Liquids, 556

Effect of Moisture on the Adsorption of Volatile Organic Compounds by Zeolite 13X, 656

Equilibrium Adsorption of Phenol-, Tire-, and Coal-Derived Activated Carbons for Organic Vapors, 545

Gas Permeability of Partially Hydrated Geosynthetic Clay Liners, 702

Model Study Based on Experiments on Toluene Vapor Removal in a Biofilter, 647

Oxidation of Toluene in Waste Gas Streams using Mesoporous Ti-Hexagonal Mesoporous Silica, 559

Prediction of Water Vapor Movement through Waste Rock, 723

Gas flow

Engineering Model of Dilute Pneumatic Conveying, 450

Geographic information systems

Stochastic Model for Landfill Gas Transport and Energy Recovery, 638

Gas pipelines

Behavior of Oil and Gas from Deepwater Blowouts, 879

Engineering Model of Dilute Pneumatic Conveying, 450

Field Investigation of Soil Heave by a Large Diameter Chilled Gas Pipeline Experiment, Fairbanks, Alaska, 149

Flow of Gasoline through Composite Liners, 620

Gasification

Greenhouse Gas Emissions from Coal Gasification Power Generation Systems, 1011

Gasoline

Spatial Heterogeneity of Microbial and Geochemical Parameters in Gasoline Contaminated Aquifers, 1723

Gates

Dynamic Analysis of a Gate-Fluid System, 516

New Large Aircraft Gate Requirement for Shared Space and Stage Construction, 1485

Case Study: Inflow of Groundwater into Open-Cast Mine Hambach, Germany, 885

Using Continuum Approach to Quantify the Remediation of Nonaqueous Phase Liquid Contaminated Fractured Permeable Formations, 669

Girders

Adhesively Bonded and Translucent Glass Fiber Reinforced Polymer Sandwich Girders, 207

Composite Shear Stud Strength at Early Concrete Ages, 1334

SUBJECT INDEX

Grasses

- Development of an Efficient Connector System for Fiber Reinforced Polymer Bridge Decks to Steel Girders, 187
- Repair of Steel Composite Beams with Carbon Fiber-Reinforced Polymer Plates, 174
- Glass**
- Bond Characteristics of Carbon, Alkali Resistant Glass, and Aramid Textiles in Mortar, 1146
- Dynamic Racking Crescendo Tests on Architectural Glass Fitted with Anchored PET Film, 63
- E-Glass/Vinylester Composites in Aqueous Environments: Effects on Short-Beam Shear Strength, 172
- Select Engineering Characteristics of Crushed Glass, 1167
- Glass fibers**
- Acoustic Emission Characterization of Damage in Hybrid Fiber-Reinforced Polymer Rods, 164
- Axial and Shear Behavior of Glass Fiber Reinforced Gypsum Wall Panels: Tests, 218
- Barrier Wall Impact Simulation of Reinforced Concrete Decks with Steel and Glass Fiber Reinforced Polymer Bars, 197
- Evaluation of Compliance Changes in Concrete Beams Reinforced by Glass Fiber Reinforced Plastics using Acoustic Emission, 1154
- Potential Retrofit Methods for Concrete Channel Beam Bridges using Glass Fiber Reinforced Polymer, 87
- Global positioning**
- Analyzing the Impact of Integrating Pseudolite Observables into a GPS/INS System, 1456
- Application of Multipath Template Technique to Real-Time Ionospheric Delay Estimation using Global Positioning System Measurements, 1457
- Crustal Deformation Analysis in the Marmara Sea Region, 1464
- Efficient Algorithm for Inverse of the Fully Populated Covariance Matrix in Global Positioning System Relative Positioning, 1447
- Geometric Modeling of Highways Using Global Positioning System Data and B-Spline Approximation, 1539
- Global Optimization of Combined Region Aggregation and Leveling Model, 235
- GPSLoc: Framework for Predicting Global Positioning System Quality of Service, 239
- Integrating a Global Positioning System and Accelerometers to Monitor the Deflection of Bridges, 1452
- New Method for Transforming Global Positioning System Height into Normal Height Based on Neural Network, 1448
- Single- and Multipoint Analyses of Global Positioning System Baseline Network: Application to Coordinate and Velocity Determinations in Central Taiwan, 1455
- Transforming Positions and Velocities between the International Terrestrial Reference Frame of 2000 and North American Datum of 1983, 1450
- Glue laminated materials**
- Testing and Analysis of Partially Composite Fiber-Reinforced Polymer-Glulam-Concrete Bridge Girders, 115
- Government agencies**
- Module-Based Construction Schedule Administration for Public Infrastructure Agencies, 258
- Grade control structures**
- Scour on Alluvial Bed Downstream of Grade-Control Structures, 827
- Gradient**
- Design Provisions for Sections Containing Unstiffened Elements with Stress Gradient, 1400
- Gradually varied flow**
- Direct Integration of the Equation of Gradually Varied Flow, 1028
- Gradually Varied FLOW Computation in Cyclic Looped Channel Networks, 1065
- Parameter Estimation for Flow in Open-Channel Networks, 1038
- Graduate study**
- Interdisciplinary Approach to Environmental Education, 1226
- Grain size**
- Probabilistic Modeling of Bed-Load Composition, 837
- Granular materials**
- Alternative Definition of Particle Rolling in a Granular Assembly, 454
- Behavior of Ellipsoids of Two Sizes, 800
- Characterizing Surface Roughness and Shape of Sands using Digital Microscopy, 223
- Discrete-Element Method Investigation of the Resilient Behavior of Granular Materials, 1524
- Examination of the Response of Regularly Packed Specimens of Spherical Particles using Physical Tests and Discrete Element Simulations, 486
- High-Rate Biodegradation of Phenol by Aerobically Grown Microbial Granules, 676
- Hysteresis of Capillary Stress in Unsaturated Granular Soil, 434
- Modeling Failure and Deformation of an Assembly of Spheres with Frictional Contacts, 392
- Normalizing Behavior of Unsaturated Granular Pavement Materials, 783
- Pavement Design Model for Unbound Granular Materials, 1543
- Sliding and Rolling Constitutive Theory for Granular Materials, 436
- Three-Dimensional Digital Representation of Granular Material Microstructure from X-Ray Tomography Imaging, 222
- Triaxial Test Simulations with Discrete Element Method and Hydrostatic Boundaries, 491
- Granular media**
- Air Binding of Granular Media Filters, 648
- Modeling Nonlinear Anisotropic Elastic Properties of Unbound Granular Bases using Microstructure Distribution Tensors, 36
- Graphic methods**
- Different Method for Determining Normal Section Curvatures on Earth Ellipsoid, 1466
- Four-Dimensional Visualization of Construction Scheduling and Site Utilization, 322
- Grasses**
- Cost-Effective Temporary Microirrigation System for Grass Establishment on Environmentally Sensitive Steep Slopes, 1044
- Optimum Use of Erosion Control Blankets and Waste Ballast (Rock) Mulch to Aid Grass Establishment on Steep Slopes, 959

Gravel

- Field Probe for Measuring Thermal Resistivity of Soils, 714
- Measurement of Coarse Gravel and Cobble Transport Using Portable Bedload Traps, 909
- Microforms in Gravel Bed Rivers: Formation, Disintegration, and Effects on Bedload Transport, 880
- Undrained Shear Strength of Granular Soils with Different Particle Gradations, 754

Gravity

- Analysis of Gravity Dam on a Complicated Rock Foundation Using an Adaptive Block Element Method, 768

Gravity loads

- Measures of Structural Redundancy in Reinforced Concrete Buildings. I: Redundancy Indices, 1402
- Measures of Structural Redundancy in Reinforced Concrete Buildings. II: Redundancy Response Modification Factor R_s , 1403

Gravity sewers

- Modeling Hydrogen Sulfide Emission Rates in Gravity Sewage Collection Systems, 672

Great Lakes

- High-Frequency Water Level Fluctuations in Lake Michigan, 1635

Greece

- Deformation and Failure of the Tymfristos Tunnel, Greece, 793

- Linking Past and Future, 1793

Stability Analyses of Rainfall Induced Landslides, 729

Stability Factors for Slopes with Nonassociated Flow Rule using Energy Consideration, 37

Two-Stepped Evolutionary Algorithm and its Application to Stability Analysis of Slopes, 234

Slopes

Accuracy of Elevation Reduction Factor, 1461

Annual Variations of Tide Level and Mudflat Profile, 1646

Causative Mechanisms of Rainfall-Induced Fill Slope Failures, 751

Cost-Effective Temporary Microirrigation System for Grass Establishment on Environmentally Sensitive Steep Slopes, 1044

Dimensionality and Directionality Effects in Newmark Sliding Block Analyses, 724

Effect of Microtopography, Slope Length and Gradient, and Vegetative Cover on Overland Flow through Simulation, 984

Effects of Hysteresis on Steady-State Infiltration in Unsaturated Slopes, 789

Estimation of Maximum Liquid Head over Landfill Barriers, 740

Finite Element Modeling of the Time-Dependent Deformation of a Slope Bounding a Hydroelectric Reservoir, 34

Influence of Stress Ratio and Stress Path on Behavior of Loose Decomposed Granite, 697

Lateral Resistance of Short Single Piles and Pile Groups Located Near Slopes, 22

Local Scour at Sloped-Wall Spur-Dike-Like Structures in Alluvial Rivers, 831

Modified Hunt's Equation Incorporating Wave Setup, 1644

Numerical Analysis of Rainfall Effects on Slope Stability, 20

Optimum Use of Erosion Control Blankets and Waste Ballast (Rock) Mulch to Aid Grass Establishment on Steep Slopes, 959

Seismic Stability of Soil Retaining Walls Situated on Slope, 698

Strength Loss and Localization at Silt Interlayers in Slopes of Liquefied Sand, 811

Sustainable Steep Vegetated Slopes Through Soil Bioengineering, 1834

Transformation of Progressive Waves Propagating Obliquely on Gentle Slope, 1651

Transition Effects in Flow over Side Weirs, 1029

Visualization Analysis of Runup and Mixing of Internal Waves on an Upper Slope, 1641

Weighted Average Method for Land Grading Design, 1046

Sludge

Conditioning of Wastewater Sludge from Science-Based Industrial Park using Freezing and Thawing, 693

Effect of Organic Loading Rate on Aerobic Granulation. I: Reactor Performance, 644

Effect of Organic Loading Rate on Aerobic Granulation. II: Characteristics of Aerobic Granules, 645

Endocrine-Disrupting Compounds in Wastewater, Sludge-Treatment Processes, and Receiving Waters: Overview, 1715

Recycled Materials in Geotechnics, 1877

Sludge digestion

Fuzzy Controller for Thermophilic Aerobic Digestion Using Nicotinamide Adenine Dinucleotide Fluorescence, 604

Minimization of Short-Circuiting Flow through Upflow Anaerobic Sludge Blanket Reactor, 629

Pilot Plant Study of Simultaneous Sewage Sludge Digestion and Metal Leaching, 578

Sludge disposal

Applicability of Oxidation Reduction Potential Response on a Full-Scale Intermittently Aerated Suspended Culture System, 1712

Sludge treatment

Effects of Stressed Loading on Startup and Granulation in Upflow Anaerobic Sludge Blanket Reactors, 602

SUBJECT INDEX

Slurries

Integrated Chemical-Biological Remediation for Polycyclic Aromatic Hydrocarbons Contaminated Soil, 1719

Stability of Long Trenches in Sand Supported by Bentonite-Water Slurry, 785

Slurry trenches

Analytical Solutions for Stability of Slurry Trench, 767

Stability of Long Trenches in Sand Supported by Bentonite-Water Slurry, 785

Slurry walls

Evaluation of Different Slurry Materials for Containment Wall Construction at a Dense Nonaqueous Phase Liquid-Contaminated Site, 1732

Verification of Contaminant Sorption by Soil Bentonite Barrier Materials Using Scanning Electron Microscopy/Energy Dispersive X-Ray Spectrometry, 624

Small business

Predicting Organizational Success within a Project-Based Joint Venture Alliance, 311

Snow

Seasonal Streamflow Forecasting using Snow Budget and El Niño-Southern Oscillation Climate Signals: Application to the Salt River Basin in Arizona, 998

Snow loads

Snow Loads: A Guide to the Use and Understanding of the Snow Load Provisions of ASCE 7-02, 1880

Snowdrifts

Simple Snowdrift Model for Distributed Hydrological Modeling, 973

Snow Loads: A Guide to the Use and Understanding of the Snow Load Provisions of ASCE 7-02, 1880

Snowmelt

Prediction of Gradation-Based Heavy Metal Mass using Granulometric Indices of Snowmelt Particles, 685

Simple Snowdrift Model for Distributed Hydrological Modeling, 973

Social factors

Integrating Brownfields Redevelopment with Transportation Planning, 1580

Socioeconomic Implications of Life Quality Index in design of Optimum Structures to Withstand Earthquakes, 1336

Socioeconomic data

Regional Economic Models for Performance-Based Earthquake Engineering, 1709

Soft soils

Elastic Solution for Tunneling-Induced Ground Movements in Clays, 41

Equal Strain Consolidation by Vertical Drains, 725

Inelastic Displacement Ratios for Design of Structures on Soft Soils Sites, 1441

Performance of a Stiff Support System in Soft Clay, 10

Physicochemical and Engineering Behavior of Cement Treated Clays, 762

Soil compaction

Earth Dam on Liquefiable Foundation and Remediation: Numerical Simulation of Centrifuge Experiments, 489

Soil Water Content and Dry Density by Time Domain Reflectometry, 786

Soil penetration tests

Soil compression

Determining Intrinsic Compressibility of Fine-Grained Soils, 780

Effects of Lime on Permeability and Compressibility of Two Tropical Residual Soils, 619

Yield, Strength, and Critical State Behavior of a Tropical Saturated Soil, 809

Soil conditions

Application of Conditioner Solution by Subsurface Emitters for Stabilizing the Surrounding Soil, 1073

Decision Support System for Microtunneling Applications, 347

Pile Installation in Difficult Soils, 737

Reducing Risks in Unfavorable Ground Conditions during Horizontal Directional Drilling, 1763

Soil deformation

Application of Kinematically Admissible Solutions to Passive Earth Pressure Problems, 25

Effects of Layer Thickness and Density on Settlement and Lateral Spreading, 752

Modeling Expansive Soil Movements Beneath Structures, 749

Soil dynamics

Numerical Investigation of Effects of Water Saturation on Blast Wave Propagation in Soil Mass, 425

Soil erosion

Investigation of Rate of Erosion of Soils in Embankment Dams, 730

Soil loss

Erosion Risk Assessment of the Jabiluka Mine Site, Northern Territory, Australia, 997

Soil mechanics

Anatomy of an Error, 770

Fractal Approach to Unsaturated Shear Strength, 720

Soils Magic: Bring Some Excitement to Civil Engineering Education, 1838

Soil mixing

GeoSupport 2004: Drilled Shafts, Micropiling, Deep Mixing, Remedial Methods, and Specialty Foundation Systems, 1861

Geotechnical Engineering for Transportation Projects, 1862

High-Modulus Columns for Liquefaction Mitigation, 748

Soil modulus

Buckling of Linear Structures above the Surface and/or Underground, 1412

Correlation of Elastic Constants with Penetration Resistance in Sandy Soils, 42

Modulus of Soil Reaction (E') Values for Pipeline Design, 1474

Soil nailing

GeoSupport 2004: Drilled Shafts, Micropiling, Deep Mixing, Remedial Methods, and Specialty Foundation Systems, 1861

Soil penetration tests

Standard Penetration Test-Based Probabilistic and Deterministic Assessment of Seismic Soil Liquefaction Potential, 822

Soil permeability

Applicability of Caliche (Gatch) as Liner/Cover in Arid Climate Landfills: Laboratory and Field Pad Testing of Permeability, 1738

Soil pollution

- Chelating-Agent-Enhanced Heavy Metal Extraction from a Contaminated Acidic Soil, 526
- Complicating Factors of using Ethylenediamine Tetraacetic Acid to Enhance Electrokinetic Remediation of Multiple Heavy Metals in Clayey Soils, 670
- Enhanced Electrokinetic Remediation of Heavy Metals in Glacial Till Soils using Different Electrolyte Solutions, 569
- Enhancing Attenuation of Petroleum Pollutants by Modifying Natural Soil with Surfactants, 1725
- Estimating the Liability of Redeveloped Contaminated Lands, 1578
- Influence of Citrate on Adsorption of Zinc in Soils, 653
- Lead Extraction from Contaminated Soil using Water-Soluble Polymers, 584
- Long-Term Migration of Light Nonaqueous-Phase Liquids in Two Unsaturated Soils: Clayey Silt and Fine Sand, 1737
- Modeling Phytoremediation of Soils, 1743
- Pollution Intrusion on Soil-Pavement System, 1527
- Preliminary Study on Treatment of Soil Enriched in Chromite Ore Processing Residue by Electrokinetics, 1717
- Retardation of Dredged Material Leachate in Foundation Soils, 691
- Selection of the Appropriate Aggregation Function for Calculating Leachate Pollution Index, 1740
- Study of the Potential for Bioremediation of Petroleum Hydrocarbons within Smear Zone Soils, 674

Soil pressure

Anatomy of an Error, 770

Soil properties

- Characterization of Models for Time-Dependent Behavior of Soils, 27

SUBJECT INDEX

Partial Factor Approach to Repetitive-Member System Factors, 1421

Structural models

Nonlinear Analysis of Steel-Concrete Composite Structures: State of the Art, 1255

Seismic Performance and Stress Transferring Mechanism of Through-Column-Type Joints for Composite Reinforced Concrete and Steel Frames, 1274

Structural Model to Predict the Failure Behavior of Plated Reinforced Concrete Beams, 168

Structural Modeling and Design Considerations for Double-Layer Shoring Systems, 297

Structural reliability

Bridge Rating and Reliability Correlation: Comprehensive Study for Different Bridge Types, 1345

Computational Platform for Predicting Lifetime System Reliability Profiles for Different Structure Types in a Network, 229

Damage Detection Utilizing the Damage Index Method to a Benchmark Structure, 378

Earthquake Duration Effect on Structural Reliability, 1322

Electromechanical Impedance-Based Structural Health Monitoring with Evolutionary Programming, 62

Implementation of Structural Earthquake-Disaster Mitigation Programs in Developing Countries, 1692

Lessons Learned on Improving Resistance of Buildings to Terrorist Attacks, 1190

Lifetime Performance Analysis of Existing Prestressed Concrete Bridge Superstructures, 1426

Measures of Structural Redundancy in Reinforced Concrete Buildings. I: Redundancy Indices, 1402

Measures of Structural Redundancy in Reinforced Concrete Buildings. II: Redundancy Response Modification Factor R_R , 1403

NDT Methods Applied to Fatigue Reliability Assessment of Structures, 1869

Partial Factor Approach to Repetitive-Member System Factors, 1421

Prediction of Reliability and Cost Profiles of Deteriorating Bridges under Time- and Performance-Controlled Maintenance, 1424

Reliability Analysis using Parabolic Failure Surface Approximation, 512

Reliability of Uncertain Inelastic Structures under Earthquake Excitation, 376

Reliability-Based Design and Construction Issues for a Micropile Foundation in Costa Rica, 1771

Resistance of Buildings to Pyroclastic Flows: Analytical and Experimental Studies and Their Application to Vesuvius, 1694

Response Sensitivity for Nonlinear Beam-Column Elements, 1366

Sampling Errors in the Estimation of Peak Wind-Induced Internal Forces in Low-Rise Structures, 386

Statistical Wavelet-Based Method for Structural Health Monitoring, 1344

Structural Health Monitoring by Piezo-Impedance Transducers. I: Modeling, 59

Structural Health Monitoring by Piezo-Impedance Transducers. II: Applications, 60

Structural response

Effect of Stress-Dependent Modulus and Poisson's Ratio on Structural Responses in Thin Asphalt Pavements, 1512

Reliability Based Service Life Prediction of Corrosion Affected Concrete Structures, 1395

Structural safety

Application of a Statistical Model Updating Approach on Phase I of the IASC-ASCE Structural Health Monitoring Benchmark Study, 367

Evaluating Earthquake Safety in Mid-American Communities, 1696

Hilbert-Huang-Based Approach for Structural Damage Detection, 371

Natural Excitation Technique and Eigensystem Realization Algorithm for Phase I of the IASC-ASCE Benchmark Problem: Simulated Data, 368

Phase I IASC-ASCE Structural Health Monitoring Benchmark Problem using Simulated Data, 365

Reliable Design Loads for Natural Phenomena: Illustration with Wind Speeds, 1693

Retrofitting Existing Masonry Buildings to Resist Explosions, 1193

Structural Assessment of Corroded Reinforced Concrete Beams: Modeling Guidelines, 1359

Structural Damage Detection using Empirical Mode Decomposition: Experimental Investigation, 500

Symbol of Strength, 1815

Two-Stage Structural Health Monitoring Approach for Phase I Benchmark Studies, 366

Variation of In-Place Concrete Core Strength in Structures from Istanbul Area: Statistical Analysis of Concrete Core Data, 1164

Structural stability

Alternative Approaches for Elastic Analysis and Design of Steel Frames. I: Overview, 1356

Alternative Approaches for Elastic Analysis and Design of Steel Frames. II: Verification Studies, 1357

Engineering Judgment and the Design that Got Away, 1215

Structural steels

Homerun, 1799

A Tale of Two Towers: The Structures, 1797

Structural strength

ACI 318-02 Beam Strain Limit of 0.004 versus 318-99 75% Balanced Steel, 1751

Measures of Structural Redundancy in Reinforced Concrete Buildings. I: Redundancy Indices, 1402

Structure reinforcement

Finite-Element Model for Wood-Based Floors with Lateral Reinforcements, 1348

Structures

Geomatics Techniques for Structural Surveying, 1451

Struts

Stability of Composite and Sandwich Struts by Mixed Formulation, 446

Students

Enhancing Students' Motivation in the Undergraduate Teaching of Hydraulic Engineering: Role of Field Works, 1234

Evaluating Learning Approaches of Construction Students in Hong Kong through a Matrix Framework, 1228

Studs

Composite Shear Stud Strength at Early Concrete Ages, 1334

Outrigger Beam-Wall Connections. I: Component Testing and Development of Design Model, 1264

Outrigger Beam-Wall Connections. II: Subassembly Testing and Further Modeling Enhancements, 1265

Stiffness and Deflection of Steel-Concrete Composite Beams under Negative Bending, 1422

Subcontractors

Mechanic's Liens on Private Projects in Hawaii, 1239

Project Buyout, 284

Subgrades

Cyclic Triaxial Tests on Clay Subgrades for Analytical Pavement Design, 1511

Design Method for Geogrid-Reinforced Unpaved Roads. I. Development of Design Method, 771

Design Method for Geogrid-Reinforced Unpaved Roads. II. Calibration and Applications, 772

Effect of Aggregate Angularity on Base Material Properties, 1177

Pollution Intrusion on Soil-Pavement System, 1527

Subirrigation

Comparison of HYDRUS-2D Simulations of Drip Irrigation with Experimental Observations, 1052

Submarine pipelines

Buoyant Jets of Elliptical Shape: Approximation for Duckbill Valves, 867

Submerged jets

Plane Turbulent Wall Jets on Rough Boundaries with Limited Tailwater, 496

Submerging

Critical Submergence for a Rectangular Intake, 492

Subsidence

Modeling of Subsidence and Reservoir Compaction under Waterflood Operations, 16

Subsurface drainage

Application of Two Drain Spacing Formula for Mexico's Humid Tropical Zone, 1026

Collection Conduits Including Subsurface Drains, 527

History of Drainage in the Bureau of Reclamation, 1036

Subsurface environment

Subsurface Characterization at Ground Failure Sites in Adapazari, Turkey, 760

Subsurface flow

GSSHA: Model to Simulate Diverse Stream Flow Producing Processes, 960

Physically Based Modeling of Interacting Surface-Subsurface Flow during Furrow Irrigation Advance, 1057

Subways

A Tale of Two Towers: The Foundations, 1796

Suction

Shallow Slides in Compacted High Plasticity Clay Slopes, 764

Velocity Distribution of Turbulent Open-Channel Flow with Bed Suction, 838

Sulfates

Dynamic Properties of Chemically Stabilized Sulfate Rich Clay, 708

Modeling Hydrogen Sulfide Emission Rates in Gravity Sewage Collection Systems, 672

Studies on Sulfate-Resistant Cement Stabilization Methods to Address Sulfate-Induced Soil Heave, 732

Sulfur

Control of Molybdenum Emission by Sorbents: Equilibrium Analysis, 541

Treatment of High Nitrate-Containing Wastewaters by Sequential Heterotrophic and Autotrophic Denitrification, 683

Supercritical flow

Flow Characteristics of Skimming Flows in Stepped Channels, 907

Simulation of Transcritical Flow in Pipe/Channel Networks, 938

Supercritical Exchange Flow Down a Sill, 877

Superstructures

Bridge Superstructure Lowering Operation—U.S. 60 Widening, Mesa, Arizona, 1755

Condition Assessment of the Eastbound 6th Avenue Viaduct using Strain Gauges, 1206

Contribution of Intermediate Diaphragms in Enhancing Precast Bridge Girder Performance, 1199

Lifetime Performance Analysis of Existing Prestressed Concrete Bridge Superstructures, 1426

Lifetime Performance Analysis of Existing Steel Girder Bridge Superstructures, 1425

Seismic Behavior of Steel Girder Bridge Superstructures, 106

Static and Fatigue Testing of Hybrid Fiber-Reinforced Polymer-Concrete Bridge Superstructure, 176

Supports

Performance of a Stiff Support System in Soft Clay, 10

Timoshenko Beam-Column with Generalized End Conditions and Nonclassical Modes of Vibration of Shear Beams, 487

Wave Propagation and Mode Localization in Simply Supported Multispan Beams with Couplers on Supports, 444

Surface drainage

Effective Approach to Improve Pavement Drainage Layers, 1542

Surface dynamics

Feasibility of Assessing Bond Condition of Asphalt Concrete Layers with Dynamic Nondestructive Testing, 1525

Surface energy

Separation of Scales in Fracture Mechanics: From Molecular to Continuum Theory via Γ Convergence, 383

Use of M Integral for Rubbery Material Problems Containing Multiple Defects, 429

Surface irrigation

Describing Near Surface, Transient Flow Processes in Unconfined Aquifers below Irrigated Lands: Model Application in the Western San Joaquin Valley, California, 1069

SUBJECT INDEX

Swelling

Weighted Average Method for Land Grading Design, 1046

Surface properties

Fractal Approach to Unsaturated Shear Strength, 720
Properties of Four Biological Flocs as Related to Settling, 664

Surface roughness

Characterizing Surface Roughness and Shape of Sands using Digital Microscopy, 223

Dynamic Behavior of Deck Slabs of Concrete Road Bridges, 95

Surface runoff

GSSHA: Model to Simulate Diverse Stream Flow Producing Processes, 960

Hydrodynamic Dispersive and Advective Processes in Watershed Responses, 999

Surface waters

Application of Remote Sensing and GIS to Model Mountainous Rivers, 964

Conjunctive Use of Surface and Groundwater for Coastal and Deltaic Systems, 1605

Impact of Membrane Surface Modification on the Treatment of Surface Water, 680

Managing Surface Water-Groundwater to Restore Fall Flows in the Cosumnes River, 1609

Potential Climate Change Effects on Ice Covers of Five Freshwater Lakes, 966

Trends in Precipitation, Streamflow, and Evapotranspiration in the Great Plains of the United States, 982

Surface waves

Characterization of Spectral Analysis of Surface Waves Shear Wave Velocity Measurement Uncertainty, 796

Multimodal Approach to Seismic Pavement Testing, 756

Surface-active agents

Control of Vaporous Naphthalene by Scrubbing with Surfactants, 550

Enhancing Attenuation of Petroleum Pollutants by Modifying Natural Soil with Surfactants, 1725

Influence of Sodium Dodecyl Sulfate and Tween 20 on Fungal Growth and Toluene Degradation in a Vapor-Phase Bioreactor, 552

Surge

Gate and Vacuum Flushing of Sewer Sediment: Laboratory Testing, 871

Intrusion within a Simulated Water Distribution System due to Hydraulic Transients. I: Description of Test Rig and Chemical Tracer Method, 606

Intrusion within a Simulated Water Distribution System due to Hydraulic Transients. II: Volumetric Method and Comparison of Results, 607

Surveys

Annual Variations of Tide Level and Mudflat Profile, 1646

Application of Total Least Squares for Spatial Point Process Analysis, 1460

Tall structures

Study on Sinusoidal Reference Strategy-Based Adaptive Feedforward Control Applied to Benchmark Wind-Excited Building, 420

TCE

Biodegradation of Chlorinated Solvents in Bioreactor Landfills, 1720

Impact of Reaction Conditions on MnO₂ Genesis during Permanganate Oxidation, 582

Multimedia Model for Analysis of Contaminant Releases in Passaic River Watershed, 1736

Permeation of Organics through Linear Low Density Polyethylene Geomembranes under Mechanical Deformation, 682

Removal of Aqueous Phase Trichloroethylene using Membrane Air Stripping Contactors, 658

Teaching methods

Enhancing Students' Motivation in the Undergraduate Teaching of Hydraulic Engineering: Role of Field Works, 1234

Evaluating Learning Approaches of Construction Students in Hong Kong through a Matrix Framework, 1228

Water Distribution Network Analysis using Excel, 924

Teamwork

Contracting Relationship Trends and Transitions, 1098

Empowerment as a Strategy for Improving Construction Performance, 1674

Exploring Critical Success Factors for Partnering in Construction Projects, 278

Potential for Implementing Relational Contracting and Joint Risk Management, 1101

Team Effectiveness and Individual Myers-Briggs Personality Dimensions, 1097

Technology

Advances in Water and Wastewater Treatment, 1845

Applications of Advanced Technologies in Transportation Engineering, 1498

Long-Term Impact of Equipment Technology on Labor Productivity in the U.S. Construction Industry at the Activity Level, 271

Process and Case Illustration of Construction Innovation, 319

Project Performance versus Use of Technologies at Project and Phase Levels, 292

Study of the Potential for Bioremediation of Petroleum Hydrocarbons within Smear Zone Soils, 674

SUBJECT INDEX

Telecommunication

Network Electricity Use Associated with Wireless Personal Digital Assistants, 1013

Telescopes

Surface Actuation of Lightweight Mirrors with Shape Memory Alloy, 51

Temperature

Application of a Temperature Dependent Viscoplastic Hierarchical Single Surface Model for Asphalt Mixtures, 1122

Calibration Accuracy for Constant Temperature Thermal Anemometer, 905

Contribution of Intermediate Diaphragms in Enhancing Precast Bridge Girder Performance, 1199

Designing a Geospatial Information Infrastructure for Mitigation of Heat Wave Hazards in Urban Areas, 1705

Energy Equation for Volatile Liquid Transport in Porous Media, 389

Fiber-Cement Extrudates with Perlite Subjected to High Temperatures, 1130

Green Buildings and Potential Electric Light Energy Savings, 78

Influence of Concrete Cover on Fire Resistance of Reinforced Concrete Flexural Members, 1360

Interaction Model for Unprotected Concrete Filled Steel Columns Under Standard Fire Conditions, 1378

Low-Temperature Oxygen Trap for Maintaining Strict Anoxic Conditions, 675

Outdoor Human Comfort and Its Assessment, 1870

Performance of Brick Aggregate Concrete at High Temperatures, 1170

Postbuckling Behavior of Axially Restrained and Axially Loaded Steel Columns under Fire Conditions, 1276

Prestressed Carbon Fiber-Reinforced Polymer Sheets for Strengthening Concrete Beams at Room and Low Temperatures, 157

Specific Surface Area of Barrier Mixtures at Various Outgas Temperatures, 617

Stress-Strain Curves for High Strength Concrete at Elevated Temperatures, 1113

Temperature Adjustment for Reference Evapotranspiration Calculation in Central Arizona, 1061

Thermal Analysis, Construction, and Monitoring Methods for Frozen Ground, 1885

Thermal Postbuckling of Laminated Composite Plates with Temperature Dependent Properties, 453

Yield Model of High Fluidity Concrete in Fresh State, 1127

Temperature distribution

Experimental Evaluation of Thermal Response and Condensation Performance of Metal Curtain Walls Subjected to Air Leakage, 69

Permanent Deformation in Flexible Pavements, 1470

Temperature effects

Assessment of Fire-Damaged Mortar Using Digital Image Process, 1149

Behavior of a Semiintegral Bridge Abutment under Static and Temperature-Induced Cyclic Loading, 101

Catalytic Oxidation of Volatile Organic Liquids, 556

Effect of Temperature on Air-Water Transfer of Hydrogen Sulfide, 531

Terrain models

Evaluation of Temperature Responses in Concrete Pavement, 1513

Forces in Wingwalls of Skewed Semi-Integral Bridges, 141

High Temperature Performance Grading of Asphalts through a Specification Criterion that Could Capture Field Performance, 1484

State-of-the-Art of Integral Abutment Bridges: Design and Practice, 134

Temperature Effect on Concrete Creep Modeled by Microprestress-Solidification Theory, 438

Temperature Field of Mass Concrete in a Pipe Lattice, 1156

Workmanship Factors Influencing Quality of Installed Parking Garage Waterproofing Membranes, 1196

Temperature measurement

Initiation of Stagnation in Drinking Water Storage Tanks, 829

Temporary structures

Dynamic Layout of Construction Temporary Facilities Considering Safety, 315

Tendons

Rocking Wall-Frame Structures with Supplemental Tendon Systems, 1328

Tennessee

Hydrologic Modeling with NEXRAD Precipitation in Middle Tennessee, 980

A New Identity, 1809

Tensile strength

Analysis of the Influence of Tensile Strength on the Stability of Eccentrically Compressed Slender Unreinforced Masonry Walls under Lateral Loads, 1331

Creep of Geotextiles using Time-Temperature Superposition Methods, 808

Development of a Direct Tensile Test for Compacted Earth Blocks Reinforced with Natural Fibers, 1115

Geosynthetic Reinforced Multitiered Walls, 814

Mechanical Characteristics of Axially Restrained Concrete Specimens at Early Ages, 1107

Modeling of Tension-Stiffening Behavior of Reinforced Concrete Ties Strengthened with Fiber Reinforced Plastic Sheets, 212

Nonlinear Mohr Envelopes Based on Triaxial Data, 741

Ultimate Condition of Fiber Reinforced Polymer-Confined Concrete, 215

Tension

Active Tensegrity Structure, 1383

Reliability Analysis of Block Shear Capacity of Coped Steel Beams, 1427

Tension Stiffening of Reinforced Concrete Ties Strengthened with Externally Bonded Fiber-Reinforced Polymer Sheets, 159

Terminal facilities

Terminal Transformation, 1817

Terrain

Numerical Evaluation of Wind Flow over Complex Terrain: Review, 57

Terrain models

Generation of Triangulated Irregular Networks Based on Hydrological Similarity, 974

SUBJECT INDEX

Ties

Thermal properties

Permeable Porosity and Thermal Conductivity of Construction Materials, 1142

Thermal resistance

Field Probe for Measuring Thermal Resistivity of Soils, 714

Thermal stratification

Initiation of Stagnation in Drinking Water Storage Tanks, 829

Thermodynamics

Numerical Efficiency in Monte Carlo Simulations—Case Study of a River Thermodynamic Model, 570

Temperature Effect on Concrete Creep Modeled by Microprestressing-Solidification Theory, 438

Thermodynamic Framework for Analysis of Waste Containment Barrier Materials, 613

Thermodynamic Framework for the Constitutive Modeling of Asphalt Concrete: Theory and Applications, 1123

UNIFAC Modeling of Cosolvent Phase Partitioning in Nonaqueous Phase Liquid-Water Systems, 573

Thermoelasticity

Asymptotic Approach for Thermoelastic Analysis of Laminated Composite Plates, 422

Thickness

Effects of Layer Thickness and Density on Settlement and Lateral Spreading, 752

Influence of Concrete Cover on Fire Resistance of Reinforced Concrete Flexural Members, 1360

Physical Properties of Turbulent Benthic Boundary Layers Generated by Internal Waves, 830

Thin shell structures

Concrete Shells Form-Finding with Surface Stress Density Method, 1335

Thin wall sections

Design Provisions for Sections Containing Unstiffened Elements with Stress Gradient, 1400

Thin wall structures

Tests and Design of Fixed-Ended Cold-Formed Steel Plain Angle Columns, 1430

Three-dimensional analysis

Crustal Deformation Analysis in the Marmara Sea Region, 1464

Effect of Intermediate Principal Stress on Overconsolidated Kaolin Clay, 722

Finite-Element Analysis of Time Domain Reflectometry Cable-Grout-Soil Interaction, 717

Lateral Resistance of Short Single Piles and Pile Groups Located Near Slopes, 22

Numerical Study of the Bearing Behavior of Piled Rafts, 19

Quasi-Three-Dimensional Slope Stability Analysis Method for General Sliding Bodies, 747

Seismic Analysis of Woodframe Structures. I: Model Formulation, 1373

Seismic Analysis of Woodframe Structures. II: Model Implementation and Verification, 1374

Three-Dimensional Analyses of Wave Barriers for Reduction of Train-Induced Vibrations, 766

Three-Dimensional Finite Element Analysis of Underground Caverns, 33

Three-Dimensional Finite-Element Analysis of High Damping Rubber Bearings, 431

Three-Dimensional Nonlinearly Varying Rectangular Loads on a Transversely Isotropic Half-Space, 35

Three-dimensional flow

Determination of Boundary Shear Stress and Reynolds Shear Stress in Smooth Rectangular Channel Flows, 870

Momentum Transport in Sharp Open-Channel Bends, 844

Numerical Modeling of Three-Dimensional Flow Field around Circular Piers, 833

Three-Dimensional Numerical Modeling of Mixing at River Confluences, 850

Three-dimensional models

Concrete Subjected to Triaxial Stress States: Application to Pull-Out Analyses, 519

Evaluation of Economic Impact of Three-Dimensional Modeling in Precast Concrete Engineering, 250

Four-Dimensional Visualization of Construction Scheduling and Site Utilization, 322

Geographic Information System-Based Visual Simulation Methodology and its Application in Concrete Dam Construction Processes, 337

Modeling of Subsidence and Reservoir Compaction under Waterflood Operations, 16

Roebling Suspension Bridge. I: Finite-Element Model and Free Vibration Response, 92

Simple Snowdrift Model for Distributed Hydrological Modeling, 973

Three-Dimensional Model for Stop-Control Intersection Sight Distance, 1497

Using a Three-Dimensional Smoothed Particle Hydrodynamics Method for Wave Impact on a Tall Structure, 1638

Thrust

Evaluation of Buried Piping Restrained Against Thrust, 1545

Thrust Restraint Design of Concrete Pressure Pipe, 1249

Tidal currents

Generating Power from Tidal Currents, 1645

Structure of Turbulent Flow in a Shallow Tidal Estuary, 861

Tidal effects

Numerical Study of Tidal Effects on Seawater Intrusion in Confined and Unconfined Aquifers by Time-Independent Finite-Difference Method, 1654

Tidal electric power generation

Generating Power from Tidal Currents, 1645

Tidal marshes

Dispersion Model for Tidal Wetlands, 896

Tides

Annual Variations of Tide Level and Mudflat Profile, 1466

Ties

Performance of Corrugated Metal Ties for Brick Veneer Wall Systems, 1128

Tension Stiffening of Reinforced Concrete Ties Strengthened with Externally Bonded Fiber-Reinforced Polymer Sheets, 159

SUBJECT INDEX

Tracers

Salinity-Induced Density Stratification in Near-Laminar Open-Channel Flows, 943

Simplification in Longitudinal Transport Modeling: Case of Instantaneous Slug Releases, 977

Tracer Study of Mixing and Transport in the Upper Hudson River with Multiple Dams, 686

Tracking

Hydrodynamic Tracking of the Massive Spring 1998 Red Tide in Hong Kong, 580

Traffic

Effect of Road Roughness on Capacity of Two-Lane Roads, 1509

Validation of a Source-Receiver Model for Road Traffic-Induced Vibrations in Buildings. I: Source Model, 510

Validation of a Source-Receiver Model for Road Traffic-Induced Vibrations in Buildings. II: Receiver Model, 511

Traffic accidents

Effectiveness of Safety Vests in Nighttime Highway Construction, 1549

Investigating the Effect of Light Truck Vehicle Percentages on Rear-End Fatal Traffic Crashes, 1516

Investigating the Effect of Light Truck Vehicle Percentages on Rear-End Fatal Traffic Crashes, 1517

Model to Evaluate Potential Accident Rate at Roundabouts, 1536

Predicting Injury Severity Levels in Traffic Crashes: A Modeling Comparison, 1491

Secondary Accident Rates on Los Angeles Freeways, 1500

Truck Safety Factors on Urban Arterials, 1551

Traffic analysis

Exploring Textural Characteristics of Spatiotemporal Traffic Contour Maps, 1483

Feasibility of Using Urban Planning Models to Support Intermediate Traffic Forecasts, 1574

Traffic assignment

Convergence of Traffic Assignments: How Much is Enough?, 1475

Dynamic User Equilibrium Traffic Assignment on Congested Multidestination Network, 1492

Large-Scale Dynamic Traffic Assignment: Implementation Issues and Computational Analysis, 1534

Scheduling of Lane Closures using Genetic Algorithms with Traffic Assignments and Distributed Simulations, 1505

Traffic capacity

Analysis of Link Capacity Estimation Methods for Urban Planning Models, 1532

Traffic congestion

Dynamic User Equilibrium Traffic Assignment on Congested Multidestination Network, 1492

Queueing and Statistical Analysis of Freeway Bottleneck Formation, 1555

Understanding Drivers' Route Choice under Long-Term Pretrip and Short-Term En-Route Traffic Information using Generalized Estimating Equations, 1554

Traffic control

Control Strategies for Oversaturated Traffic, 1520

Traffic management

New Optimal Cycle Length Formulation for Pretimed Signals at Isolated Intersections, 1540

Traffic Adaptive Control for Oversaturated Isolated Intersections: Model Development and Simulation Testing, 1535

Traffic control devices

Bridge to the Future, 1822

Rock on Down the Road, 1798

Three-Dimensional Model for Stop-Control Intersection Sight Distance, 1497

Traffic delay

Impact of Reduced Vertical Separation Minimum Implementation on Airport System Infrastructures, 1548

New Optimal Cycle Length Formulation for Pretimed Signals at Isolated Intersections, 1540

Scheduling of Lane Closures using Genetic Algorithms with Traffic Assignments and Distributed Simulations, 1505

Traffic engineering

Feasibility of Using Urban Planning Models to Support Intermediate Traffic Forecasts, 1574

Traffic flow

Control Strategies for Oversaturated Traffic, 1520

Development of a Delay Model for Roundabouts in Jordan, 1478

Evaluation of Potential Transit Signal Priority Benefits along a Fixed-Time Signalized Arterial, 1502

Mesoscale-Wavelet Freeway Work Zone Flow and Congestion Feature Extraction Model, 1480

Microscopic Modeling of Driver Behavior in Uninterrupted Traffic Flow, 1518

Queueing and Statistical Analysis of Freeway Bottleneck Formation, 1555

Tool to Evaluate Safety Effects of Changes in Freeway Traffic Flow, 1493

Traffic management

Applications of Advanced Technologies in Transportation Engineering, 1848

Avoidance Maneuvering in the Vicinity of the Top of Descent, 61

Balance of Car Ownership under User Demand and Road Network Supply Conditions—Case Study in Hong Kong, 1561

Comparison of Alternative Trip Generation Models for Hurricane Evacuation, 1707

CORSIM-Based Simulation Approach to Evaluation of Direct Left Turn versus Right Turn Plus U-Turn from Driveways, 1477

Detecting Semantic Anomalies in Truck Weigh-in-Motion Traffic Data using Data Mining, 249

Deterministic Models for Degraded Airside Capacity and Delays, 1529

Games, Heuristics, and Risk Averseness in Vehicle Routing Problems, 1562

Investigating the Effect of Light Truck Vehicle Percentages on Rear-End Fatal Traffic Crashes, 1516

Large-Scale Dynamic Traffic Assignment: Implementation Issues and Computational Analysis, 1534

Northern Exposure, 1807

Optimizing Traffic Prediction Performance of Neural Networks under Various Topological, Input, and Traffic Condition Settings, 1519

Performance Evaluation of Adaptive Ramp-Metering Algorithms using Microscopic Traffic Simulation Model, 1506

Queueing and Statistical Analysis of Freeway Bottleneck Formation, 1555

Toward Intelligent Variable Message Signs in Freeway Work Zones: Neural Network Model, 1479

Understanding Drivers' Route Choice under Long-Term Pretrip and Short-Term En-Route Traffic Information using Generalized Estimating Equations, 1554

Wireless Location Technology-Based Traffic Monitoring: Critical Assessment and Evaluation of an Early-Generation System, 1533

Traffic models

Evaluating Speed Differences Between Cars, Light-Duty Trucks, and Vans for Emissions Modeling, 1558

Evaluation of Potential Transit Signal Priority Benefits along a Fixed-Time Signalized Arterial, 1502

Feasibility of Using Urban Planning Models to Support Intermediate Traffic Forecasts, 1574

Microscopic Modeling of Driver Behavior in Uninterrupted Traffic Flow, 1518

Model to Evaluate Potential Accident Rate at Roundabouts, 1536

Sensitivity Analysis of Transit Signal Priority Impacts on Operation of a Signalized Intersection, 1556

Traffic safety

Tool to Evaluate Safety Effects of Changes in Freeway Traffic Flow, 1493

Traffic signals

Assessment of Three Simulation Models for Diamond Interchange Analysis, 1503

Evaluation of Potential Transit Signal Priority Benefits along a Fixed-Time Signalized Arterial, 1502

New Optimal Cycle Length Formulation for Pretimed Signals at Isolated Intersections, 1540

Performance Evaluation of Signalized Urban Intersections under Mixed Traffic Conditions by Gray System Theory, 1482

Sensitivity Analysis of Transit Signal Priority Impacts on Operation of a Signalized Intersection, 1556

Traffic Adaptive Control for Oversaturated Isolated Intersections: Model Development and Simulation Testing, 1535

Traffic signs

Assessing the Occlusion Effect of Large-Dimension Vehicles on Traffic Signs at Multilane Highways, 1541

Three-Dimensional Model for Stop-Control Intersection Sight Distance, 1497

Traffic speed

Evaluating Speed Differences Between Cars, Light-Duty Trucks, and Vans for Emissions Modeling, 1558

Integration Modeling Framework for Estimating Mobile Source Emissions, 1489

Traffic surveillance

Event Data-Based Traffic Detector Validation Tests, 1504

Exploring Textural Characteristics of Spatiotemporal Traffic Contour Maps, 1483

Traffic surveys

Modeling Trip Generation with Data from Single and Two Independent Cross-Sectional Travel Surveys, 1576

Multiple-Vehicle Origin—Destination Matrix Estimation from Traffic Counts using Genetic Algorithm, 1507

Use of Greenway Trails in Indiana, 1581

Traffic volume

Analysis of Link Capacity Estimation Methods for Urban Planning Models, 1532

Vehicle impacts

Truck Performance Curves Reflective of Truck and Pavement Characteristics, 1552

Validation of a Source-Receiver Model for Road Traffic-Induced Vibrations in Buildings. I: Source Model, 510

Vehicles

Dynamic Behavior of Deck Slabs of Concrete Road Bridges, 95

Evaluating Speed Differences Between Cars, Light-Duty Trucks, and Vans for Emissions Modeling, 1558

Games, Heuristics, and Risk Averseness in Vehicle Routing Problems, 1562

Investigating the Effect of Light Truck Vehicle Percentages on Rear-End Fatal Traffic Crashes, 1516

SUBJECT INDEX

Vibration

Investigating the Effect of Light Truck Vehicle Percentages on Rear-End Fatal Traffic Crashes, 1517
Validation of a Source-Receiver Model for Road Traffic-Induced Vibrations in Buildings. II: Receiver Model, 511

Wheel Load Distribution in Simply Supported Concrete Slab Bridges, 96

Velocity

Bound of Earthquake Input Energy, 1367
Effect of Covers for Soil and Water Conservation using Tilting Flume, 1037
Escoffier Curves and Inlet Stability, 1636
Estimation of Average Stream Velocity, 933
Estimation of Seismic Demands on Isolators Based on Nonlinear Analysis, 1278
Evaluation of Peak Ground Velocity as a 'Good' Intensity Measure for Near-Source Ground Motions, 474
Evaluation of Relative Motions between Closely Spaced Vessels in Bidirectional Irregular Waves, 1637
Experimental Approach to the Hydraulics of Vertical Slot Fishways, 826
Flow and Solute Transport in Strongly Heterogeneous Porous Media, 1728
Fluid-Solid Interaction in Particle-Laden Flows, 518
Large Scale Clear-Water Local Pier Scour Experiments, 917
Large Scale Particle Image Velocimetry for Low Velocity and Shallow Water Flows, 916
Single- and Multiepoch Analyses of Global Positioning System Baseline Network: Application to Coordinate and Velocity Determinations in Central Taiwan, 1455
Transforming Positions and Velocities between the International Terrestrial Reference Frame of 2000 and North American Datum of 1983, 1450
Transition from Nondeformable Projectile Penetration to Semihydrodynamic Penetration, 375
Using a Three-Dimensional Smoothed Particle Hydrodynamics Method for Wave Impact on a Tall Structure, 1638

Velocity distribution

Estimation of Mean Velocity in Natural Channels Based on Chiu's Velocity Distribution Equation, 948
Flow and Velocity Distribution in Meandering Compound Channels, 864
Momentum Transport in Sharp Open-Channel Bends, 844
Velocity Distribution in the Roughness Layer of Rough-Bed Flows, 925
Velocity Distribution of Turbulent Open-Channel Flow with Bed Suction, 838

Velocity profile

Analysis of Velocity Lag in Sediment-Laden Open Channel Flows, 890
Density Stratification Effects in Sand-Bed Rivers, 900
Estimation of the Longitudinal Dispersion Coefficient using the Velocity Profile in Natural Streams, 848
Velocity Distribution and Dip-Phenomenon in Smooth Uniform Open Channel Flows, 939

Veneers

Performance of Corrugated Metal Ties for Brick Veneer Wall Systems, 1128

Ventilation

Design of School Building HVAC Retrofit with Hybrid Geothermal Heat-Pump System, 74
Management of Radon in Tunnel Drilling, 332

Verification

Investigation of the Gyration Angle of Superpave Gyrotory Compactors, 1158
Long-Term Performance of Epoxy Coated Clay Bricks in Sulfuric Acid, 1145
Reliability Verification using Proof Pile Load Tests, 812

Vermont

Constructing a Scenic Bridge, 1769
Structural Analyses of Two Historic Covered Wooden Bridges, 148

Vertical loads

Design Strategies for Piled Rafts Subjected to Nonuniform Vertical Loading, 694
Vertical Stability of Anchored Concrete Soldier-Pile Walls in Clay, 817

Vertical movement

Lateral and Upward Soil-Pipeline Interactions in Sand for Deep Embedment Conditions, 776

Vibration

Dynamic Response of Footings Resting on a Sand Layer of Finite Thickness, 758
Experimental and Analytical Modal Analysis of Steel Arch Bridge, 1341
Exploring the Use of Three-Dimensional Dispersion to Damp Building Vibrations, 395
Flexibility-Based Approach for Damage Characterization: Benchmark Application, 369
Hybrid Feedback-Least Mean Square Algorithm for Structural Control, 1251
Minimizing Construction Vibration Effects, 1756
Model for Lateral Excitation of Footbridges by Synchronous Walking, 1242
Moving Least-Squares Differential Quadrature Method for Free Vibration of Antisymmetric Laminates, 515
Natural Vibrations of Laminated and Sandwich Plates, 499
Roebbling Suspension Bridge. I: Finite-Element Model and Free Vibration Response, 92
Roebbling Suspension Bridge. II: Ambient Testing and Live-Load Response, 93
Structural Damage Detection using Empirical Mode Decomposition: Experimental Investigation, 500
Timoshenko Beam-Column with Generalized End Conditions and Nonclassical Modes of Vibration of Shear Beams, 487
Validation of a Source-Receiver Model for Road Traffic-Induced Vibrations in Buildings. I: Source Model, 510
Validation of a Source-Receiver Model for Road Traffic-Induced Vibrations in Buildings. II: Receiver Model, 511
Vibration of Laminated-Faced Sandwich Plate by a New Refined Element, 56
Wave Barriers for Reduction of Train-Induced Vibrations in Soils, 819
Wavelet-Hybrid Feedback-Least Mean Square Algorithm for Robust Control of Structures, 1252

Vibration analysis

Application of Wavelet Approach for ASCE Structural Health Monitoring Benchmark Studies, 372

Functional Networks in Structural Engineering, 237

Recurrent Single Delaminated Beam Model for Vibration Analysis of Multidelaminated Beams, 478

Statistical Wavelet-Based Method for Structural Health Monitoring, 1344

Vibration control

Active Control of Cross Wind Response of 76-Story Tall Building using a Fuzzy Controller, 416

Applicability of Seismic Protective Systems to Structures with Vibration-Sensitive Equipment, 1405

Behavior of Torsionally Coupled Structures with Variable Frequency Pendulum Isolator, 1343

Control Effect for 20-Story Benchmark Building using Passive or Semiactive Device, 407

Crossing the Hollandsch Diep, 1781

Dynamic Modeling of Large-Scale Magnetorheological Damper Systems for Civil Engineering Applications, 482

Effects of Site Classes on Damping Reduction Factors, 1404

Exploring the Use of Three-Dimensional Dispersion to Damp Building Vibrations, 395

Measurement Method for Continua by Image Processing, 1352

Minimizing Construction Vibration Effects, 1756

Multiojective Optimal Fuzzy Logic Control System for Response Control of Wind-Excited Tall Buildings, 421

Multiojective Optimal Fuzzy Logic Controller Driven Active and Hybrid Control Systems for Seismically Excited Nonlinear Buildings, 405

Study on Sinusoidal Reference Strategy-Based Adaptive Feedforward Control Applied to Benchmark Wind-Excited Building, 420

Three-Dimensional Analyses of Wave Barriers for Reduction of Train-Induced Vibrations, 766

Vibration Control of the Wind-Excited 76-Story Benchmark Building by Liquid Column Vibration Absorbers, 414

Vibration Control of Wind-Excited Tall Buildings using Sliding Mode Fuzzy Control, 418

Wave Barriers for Reduction of Train-Induced Vibrations in Soils, 819

Vibration measurement

Baseline Models for Bridge Performance Monitoring, 426

Vibration tests

Applicability of Seismic Protective Systems to Structures with Vibration-Sensitive Equipment, 1405

Virginia

Air Show, 1778

Evaluation of In-Service Performance of Tom's Creek Bridge Fiber-Reinforced Polymer Superstructure, 1200

Light at the End of the Tunnel, 1790

Viscoelasticity

Issues Affecting Measurement of the Complex Modulus of Asphalt Concrete, 1161

Linear Rheological Behavior of Bituminous Paving Materials, 1129

Linear Viscoelastic Analysis of Asphalt Mastics, 1119

Linear Viscoelastic and Fatigue Characteristics of Styrene-Butadiene-Styrene Modified Asphalt Mixtures, 1179

Random Vibration of Systems with Viscoelastic Memory, 476

Seismic Response of Full-Scale Structure with Added Viscoelastic Dampers, 1299

Temperature Effect on Concrete Creep Modeled by Microstress-Solidification Theory, 438

Theoretical Interpretation of Impulse Response Tests of Embedded Concrete Structures, 477

Thermodynamic Framework for the Constitutive Modeling of Asphalt Concrete: Theory and Applications, 1123

Viscoplasticity

Application of a Temperature Dependent Viscoplastic Hierarchical Single Surface Model for Asphalt Mixtures, 1122

Linear and Nonlinear Viscoelastic Analysis of the Microstructure of Asphalt Concretes, 1120

Modeling and Simulation of Porous Elastoviscoplastic Material, 424

Viscosity

Flow Performance of High-Fluidity Concrete, 1174

UNIFAC Modeling of Cosolvent Phase Partitioning in Nonaqueous Phase Liquid-Water Systems, 573

Visibility

Assessing the Occlusion Effect of Large-Dimension Vehicles on Traffic Signs at Multilane Highways, 1541

Void ratio

Fundamental Parameters of Cement-Admixed Clay-New Approach, 797

Mixed Experimental and Numerical Approach to Evaluation of Material Parameters of Clayey Soils, 30

New Compression Index Equation, 716

Volatile organic chemicals

Benzene Nonaqueous Phase Liquids Removal under Air-Sparged Conditions, 603

Capture of Organic Vapors using Adsorption and Electrothermal Regeneration, 548

Catalytic Oxidation of Volatile Organic Liquids, 556

Characterizing Polyurethane Foam as a Sink for or Source of Volatile Organic Compounds in Indoor Air, 633

Destruction of 1,1,1-Trichloroethane using Dielectric Barrier Discharge Nonthermal Plasma, 558

Effect of Moisture on the Adsorption of Volatile Organic Compounds by Zeolite 13X, 656

Effectiveness of Scrap Tire Chips as Sorptive Drainage Material, 612

Electrothermal Desorption using Joule Effect on an Activated Carbon Monolith, 546

Influence of Sodium Dodecyl Sulfate and Tween 20 on Fungal Growth and Toluene Degradation in a Vapor-Phase Bioreactor, 552

Liquid Assets, 1812

Model Study Based on Experiments on Toluene Vapor Removal in a Biofilter, 647

Modeling Volatile Organic Compound Sorption in Activated Carbon. I: Dynamics and Single-Component Equilibrium, 543

SUBJECT INDEX

Waste site cleanup

- Modeling Volatile Organic Compound Sorption in Activated Carbon. II: Multicomponent Equilibrium, 544
